RECEIVED

JAN 14 2025

NEVADA COUNTY  
BOARD OF SUPERVISORS

EACH SUPERVISOR RECD.

**Board of Supervisors Meeting 1.14.25**

**DenCob Advocacy for Consumption**

1. Introduction

- Introduce yourself and position with DenCob
- Explain what DenCob is - size of farm, first on-farm retail sales
- Animal sanctuary

2. Background

- State vision and mission of DenCob: Dencob is committed to educate the public on the benefits and proper use of cannabis
- "Give back" ethos of DenCob and all DenCob does for community

3. Benefits of Consumption

- share how DenCob would benefit by having a consumption component :having on site consumption for dencob is a great benefit for nevada county and all the local farmers who work with dencob farms, seed to sell like vineyards is a great venue for consumers to come to the farm and be educated about how organic cannabis is grown, the therapeutic benefits of using it and how to properly dose on site
- compare the biz model to a winery / tasting room / brewery : Dencob Farms should be treated no different than a winery or brewery, the main difference for consumers is where alcohol is intoxicating, Cannabis used as a therapeutic and having the ability to allow the customers to use cannabis on the farm, dencob will be able to show the customers how to prepare their cannabis and use it properly to elevate their health and not get high
- share the medical side of educating patients how to consume : Most patients struggle with medicine, at Dencob we are able to educate the customers on the benefits of cannabis for their specific conditions and with on site consumption we can teach them how to properly dose cannabis to elevate their treatments
- talk about demographic of people who come to DenCob - older folks : Dencob has been enjoying a much older customer base ( many over 65 years old ) we experience many older first time cannabis users including Doctors, Nurses, lawyers, all looking for a better path to their medication and health
- talk about the "experience" of being at DenCob from a patient's perspective - talking to Juan and learning about farming techniques, seeing the cannabis in the farm, learning about diff strains, being able to hang out and enjoy the experience of being at the farm, seeing the animals in the pasture etc,,: there is such a lack of education with cannabis and the information most of the public gets is how bad the cannabis products are because of all of the pesticides in it,when customers visit dencob farms, their education starts with How the product is sungrown and organic so they dont have the fear of all the pesticides they hear about, they learn how the product is grown and cared for, they get

to see all the animals and what Farm life is all about, it is truly a great experience for all to enjoy

- add anything else about the benefits of consumption at retail (patients learn about proper dosages & ask questions, etc) : Dencob is experiencing first time cannabis users from many other counties, they come to the farm because they have heard about the experience and prices, as first time users they always gamble on what to purchase, if Dencob has on site consumption the customers would have the ability to try different products and then be able to make a well educated purchase based on their experience
- The economic development angle to provide alternative source of income, employment opportunities and support the local tax base. - ALLOWS FOR BIZ GROWTH!
- Improve tourism by providing a place to educate consumers about medical cannabis : Dencob farms primary focus is to bring customers in from other counties by talking about the great sungrown organics from Nevada county, we believe that when we receive on site consumption we will see a dramatic increase in traffic sales from many other counties, bringing in revenue that is currently not realized in Nevada County

#### 4. The "ask"

- In 2025, please direct staff to research consumption at cannabis retail and you hope this can be a topic of discussion at the board workshop.
