Describe how your County SSD will implement Operational Criteria #1.1. If your County SSD already supports this process, please describe at a high-level how the current process operates.

Nevada County DSS is already meeting operational criteria #1. Wayne Brown Correctional Facility (WBCF) currently screens each person while they are being booked. We ask whether the person currently has Medi-Cal and if they would like to enroll in Medi-Cal. The answers are documented in our Jail Management System. This information is available to County SSD. DSS is contacted via email from Wellpath and the jail if suspension is needed. This sent to a team email where the action is taken by the MEDS clerk. DSS then contact either Wellpath or the jail that the suspension is in place. If the individual isn't enrolled in Medi-Cal, DSS works with Wellpath to expedite the Medi-Cal enrollment process.

Describe how your County SSD will implement Operational Criteria #2.1. If your County SSD already supports this process, please describe at a high-level how the current process operates.

Nevada County DSS is already meeting operational criteria #2. DSS accepts applications from all avenues. We often receive applications for inmate from neighboring counties such as Sierra and Plumas. All jail Medi-Cal applications are expedited, and we follow the ICT processes by regulation.

Describe how your County SSD will implement Operational Criteria #3.1. If your County SSD already supports this process, please describe at a high-level how the current process operates

Nevada County DSS is already meeting operational criteria #3. While we are looking to automate and modernize all our Justice-Involved processes we currently communicate via email, phone, and in-person to make every attempt to complete Medi-Cal applications received from WBCF. We always follow the ICT processes by regulation.

Describe how your County SSD will implement Operational Criteria #4.1. If your County SSD already supports this process, please describe at a high-level how the current process operates.

Nevada County DSS is already meeting operational criteria #4. DSS has open lines of communication with the jail and Wellpath to communicate status via email and phone. We make every effort to reach out for assistance in completing Justice-Involved Medi-Cal applications timely including seeing the inmate face to face in necessary.

Describe how your County SSD will implement Operational Criteria #4.2. If your County SSD already supports this process, please describe at a high-level how the current process operates

Our DSS offices are directly next to WBCF, if the inmate has any need we can attempt to complete any gaps not fulfilled prior to release. We mail all documents to the requested address on the Medi-Cal application and can also email temporary BICs to Wellpath if the inmate needs.

Describe how your County SSD will implement Operational Criteria #5.1. If your County SSD already supports this process, please describe at a high-level how the current process operates.

Nevada County DSS is already meeting operational criteria #5. Wayne Brown Correctional Facility (WBCF) currently screens each person while they are being booked. This information is as accurate as possible at the time of application. If there are questions about contact information DSS can contact Wellpath for confirmation or can contact the inmate for confirmation directly.

Describe how your County SSD will implement Operational Criteria #6.1. If your County SSD already supports this process, please describe at a high-level how the current process operates

Nevada County DSS is already meeting operational criteria #6. DSS is contacted via a team email that includes MEDS clerk, Justice-Involved eligibility worker and Supervisors. This team email is monitored daily, and we have processes in place to expedite the action and let Wellpath know the action has been completed.

Describe how your County SSD will implement Operational Criteria #6.2. If your County SSD already supports this process, please describe at a high-level how the current process operates.

All Justice-Involved applications are expedited. In the case of immediate need, DSS staff will prioritize these applications and communicate with WBCF and Wellpath to complete the application if anything additional is needed. DSS will also real-time benefits to the MEDS system and provide a temporary BIC if needed.

Describe how your organization(s) will ensure sustainability of pre-release enrollment and suspension processes that are implemented using PATH JI Round 2 funding.

Nevada County DSS plans to build off our current Justice-Involved procedures and automate and modernize as many procedures as possible. Our goal is to create a platform that will pull JMS data in real time and organize the tracking processes for various Medi-Cal applications, suspensions, and releases. This platform will also have the possibility to expand to include Behavioral Health system communication and the potential to pull information for CalFresh applications in the future.

Main uses for round two funding-

- Platform for collecting and organizing data
- Clear policies and procedures
- Equipment to facilitate Justice-Involved processes
- Software and other support costs.

We envision a system that can pull data in real time that will provide at a glance experience as well as updated technology that will sustain and modernize our Justice-Involved processes for years to come. More organized, and faster processes to ensure better service for our customers.
