RE: Letter of Support for Extension of Nevada County Ordinance Prohibiting Open Fire along the South Yuba River Corridor

Honorable Chair Hall,

It has come to our attention that, at its regular meeting on November 17, 2020, the Nevada County Board of Supervisors will consider a proposed Ordinance extending the prohibition on open fire – during fire season - on private properties along the South Yuba River in Nevada County. On behalf of the **Nevada County Consolidated Fire District** and as a member of the Yuba River Public Safety Cohort, I hereby express our support for the considered Ordinance.

Unfortunately, wildfire is the new normal in California, with increasingly devastating fires sweeping through the state. The August 2020 Jones Fire made it clear that a fire in the South Yuba River canyon can leave the canyon and head toward residences and businesses with frightening speed.

We are encouraged that Nevada County has made it a top priority to implement policies and programs to reduce the risk of wildfire and its threats to life, property, and the environment. The **Nevada County Consolidated Fire District** supports the Ordinance as a sensible precautionary measure to reduce the risk of human-caused wildfire in the Yuba River Corridor. Furthermore, a prohibition on open fire during fire season (as declared by CAL FIRE and the United States Forest Service), would align with policies that are already in place on public lands and in similar communities, such as Truckee. We encourage the Nevada County Board of Supervisors to take the necessary actions to adopt this measure.

The proposed Ordinance takes a reasonable approach to wildfire prevention and public safety in an era when the dangers of wildfire are more severe than ever before. Therefore, the **Nevada County Consolidated Fire District** strongly supports the proposed Ordinance and encourages the Nevada County Board of Supervisors to adopt the proposed action.

Sincerely,

James L. Turner, Fire Chief
