To whom it may concern,

Nevada County Media would like to take possession of truck with County Asset # 27452 and outfit it with production equipment for mobile use. This would allow Nevada County Media to have the capability of capturing community events and external Government meetings with live multi-camera streaming and broadcasting.

Live broadcast and recordings could now be done in a professional manner at parades, festivals, the Nevada County Fair, and other such events year round. Residents who would not otherwise be able to attend and benefit from these enrichment activities could now have a way to partake.
