

CURRENT AIR PHOTO

1947 HISTORIC AIR PHOTO

LEGEND

- Area of Disturbance
- Wetland mapped on Centennial Site
- Centennial Industrial Site - Boundary
- Elevation Contour Line - 10 foot intervals
- Elevation Contour Line - 2 foot intervals
- Creek - Perennial
- Creek - Intermittent
- Creek - Ephemeral
- Culvert
- Setback - "Non-disturbance buffer" (approximate)
- FEMA 100 year floodplain boundary
- Boundary of historic tailings placement (approximate)
- Proposed NID potable water pipe extension
- Pine Hill Flannelbush

Historic 1947 airphoto taken after WWII mine closure (source USGS).
Centennial Industrial Site was historic mine tailings site.
Cleanup of mine tailings area on Centennial site is subject to a separate DTSC clean-up project.
DTSC clean-up project will be completed before engineered fill is placed on the site as part of the Idaho-Maryland Mine Project.
The majority of impacts and mitigation for removal of wetlands and streams which have formed on top of the historic mine tailings site are anticipated to be from the DTSC clean-up project (before the engineered fill is placed from the Idaho-Maryland Mine Project).
Several Pine Hill flannelbush plants will be impacted by the placement of engineered fill as part of the Idaho-Maryland Mine Project.
