WHEREAS, Opioid Use Disorder (OUD) is a leading cause of morbidity and mortality among youth in the United States. Medication-assisted treatment (MAT) is the use of medication in combination with counseling and behavioral therapies for the treatment of Substance Use Disorder. For those with an OUD, medication addresses the physical difficulties that individuals experience when they stop taking opioids. It is recommended that MAT is utilized in treating adolescents with OUD as it reduces adolescents' opioid misuse, injection drug use, and has also been associated with reductions in drug overdoses. Nevada County is in need of a MAT provider to deliver lifesaving services to youth diagnosed with OUD; and
