PROJECT: Nevada County – 25 Additional Cuff ports

PROPOSAL: N#09: Under this proposal, CTG shall supply and install 25 new Cuff ports and AirTeq snaplocks. Adtec, who made the existing locks in your facility, has been out of business for many years, and the locks are no longer available. We experimented with an after-market manufacturer, CPC, and found the locks to be inferior and more expensive than modern replacements. Under this proposal, we will provide new AirTeq snaplocks for the Cuff ports, which is the same manufacturer as your door locks. It is realized that a new key will be required, and we are furnishing 3 new keys for the new locks. Finally, we will remove a lower window for the remaining Rec door, provide a metal cover plate, and mount the one Cuff port in that plate.

NET PRICE: \$49,835.00, including CA sales tax on materials

REMARKS:

- 1) This proposal does not include the installation of wire and cable.
- 2) Prices Indicated includes labor, parts, freight, vehicle costs, travel time, per diem, and one-year warranty on supplied new parts.
- 3) Proposal is based upon performing the work on the doors in place, and does not include removal of door nor smoke evacuation equipment.
- 4) Cuff ports will be primer painted, with final painting by Owner.

PROPOSAL ACCEPTED
