Project Overview

Background

The final week of 2021 brought extreme weather conditions creating a local disaster in large portions of the Sierra Nevada Foothills. Nevada County was hit hard with widespread power outages and extreme amounts of tree damage. Cost for green waste removal remains a significant obstacle locally.

In response to this obstacle, the Fire Safe Council of Nevada County (FSCNC) hosted the 2019 Green Waste Event, resulting in removal of over 500 tons of green waste from Western Nevada County. In subsequent years FSCNC has partnered with The County of Nevada to continue offering offer this program.

FSCNC offers several programs to accomplish its mission of wildfire prevention and preparedness: providing education and outreach, running residential and roadside chipping programs, management of large-scale fuel break projects, certification of FireWise USA communities, and conducting community green waste events. The Nevada County OES is committed to reducing the loss of life during a wildfire by improving evacuation routes and early warning systems, creating more defensible space around private properties and driveways, building a network of maintained fuel breaks, engaging residents in emergency preparedness and fire-safe stewardship, and enhancing critical infrastructure. The residents of Nevada County benefit greatly from the symbiotic relationship between these agencies; their combined competencies and funding will provide additional capacity for reducing fuel loads in the community. The skills and services offered by these entities offer great crossover to fit the current need of local disaster recovery. FSCNC and Nevada County OES will meet regularly to determine when to terminate any and all operation of services performed by FSCNC, and its subcontractors related to storm clean up.

Objective

The objective during this local State of Emergency is to assist with disaster recovery using any of the tools, programs, or services that FSCNC has available. This project plan and accompanying Budget are made available as a potential “menu of services” which can be altered as needed, during the disaster cleanup process, upon approval of both the County of Nevada and FSCNC. These services which are typically viewed in the light of Wildfire preparedness have much crossover into the current disaster and subsequent need for cleanup and tree removal. FSCNC is ready to assist our community with disaster clean up. Experience from past successful events, and utilizing past lessons learned on the collection and removal of Vegetation waste will aid in local disaster response. We will again utilize the designated “Super Site” generously allowed at the old Idaho Maryland mine owned by Rise Grass Valley.

Project Deliverables: Planning Phase

Project Plan

Responsibilities of the FSCNC include, but are not limited to, writing this project plan, specifying any currently known deliverables and success criteria. Plan includes budget data, available services / tasks, a list of resources available, site maps, and change control process. Project Plan will provide adequate details for both parties and will be approved by representatives of NCOES as well as FSCNC.

Project Budget

FSCNC will provide a detailed budget to NCOES with categories for equipment purchases, equipment rental, vendor costs, supplies, labor, transportation, and any other significant categories. This project plan and accompanying Budget are made available as a potential “menu of services” which can be altered upon approval of both the County of Nevada and FSCNC, as needed during the disaster cleanup process. The attached budget captures available resources and staff that can be utilized for 1 program or all programs. Resource needs and utilization will be determined and prioritized by the Office of Emergency Services as disaster cleanup is ongoing. This budget is indicative of cost per week and based on operating a 5-day schedule. Staff pricing is indicative of over time rates, it should be noted that material pricing may fluctuate determined by market availability outside of the control of FSCNC. Staff size can be scaled down to fit individual program needs as they change. FSCNC and Nevada County OES will meet regularly to determine when to terminate any and all operation of these services performed by FSCNC, and its subcontractors related to storm clean up.

Contract

NCOES will provide a written contract referencing this Project Plan and accompanying budget for approval and signature by both parties. Contract will outline key points and provide protections for both parties.

Funding

The 2022 Local State of Emergency or winter storm cleanup will be funded by the Nevada County Government. All expenses and disbursements to event subcontractors hired by FSCNC shall be performed by FSCNC, in accordance with the agreed upon budget contained herein.

Site Selection / Contracts

FSCNC will secure collection site permissions and obtain a signed contract from site owner and will make copies of such contracts available to NCOES, if requested. FSCNC will serve as the manager of all drop sites and will work with site owners to determine access, security, and best practices for each site.

Insurance / Indemnification

FSCNC will provide each site owner with a rider naming the owner as an additional insured and will provide NCOES with a copy of each rider, upon request. FSCNC will also insure all staff and volunteers. FSCNC shall indemnify and hold harmless NCOES from and against all claims, liabilities, losses, damages or expenses arising out of or relating to all acts, failures to act or other conduct of FSCNC or its contracted vendors for the duration of event operations.

Vendor Contracts

FSCNC will select suitable vendors for hauling, processing and transportation, chipping or grinding services, or other services as needed, within budget constraints. Every effort will be made to utilize in-house services by FSCNC to maximize the amount of green waste to be collected and processed.

Permitting

If green waste processing is added later and if that becomes the responsibility of FSCNC - FSCNC shall secure any required permits as required for operation of all drop sites and operations therein, including, but not limited to, Northern Sierra Air Quality Management District and the State of California CalRecycle Enforcement Agency Permitting. NCOES will assist FSCNC with meeting permitting requirements as needed.

Staffing

FSCNC will provide an adequate number of trained staff to ensure a smooth and expedient operational list of services. FSCNC will schedule shifts as needed and will ensure backup staff is available in the event a staff member becomes injured and cannot complete his/her shift. The Brunswick site will have a specified Site Supervisor, with specific duties as described in Project Planning: Operational Phase below.

Volunteer Solicitation & Communication

IF needed - FSCNC will also utilize volunteers from internal recruiting and through the Volunteer Hub system via Connecting Point.

Event Outreach & Communication

NCOES shall develop print and electronic outreach materials for use by NCOES and FSCNC and other partners to communicate event specifics (including hours, dates, locations, green waste material limitations) of the event. Such outreach materials electronic assets for social media outreach, and regular media outreach. NCOES shall coordinate and perform outreach activities, utilizing materials developed by NCOES.

Project Deliverables: Operational Phase

Site Operations

FSCNC will be present on site prior to the event to identify any specific actions that need to be taken in advance of the event to ensure accessibility, safety, and security:

- Measures will be taken to ensure all equipment is secured and protected from theft for the duration of the event. Vendors will remain responsible for securing their own equipment or removing it from the premises at the end of each collection, processing, or distribution day.
- One or more photos will be taken by the Site Supervisor at the beginning and end of each day that staff is on site and will submit that photo to FSCNC. The photo(s) will include images of all piles of green waste accumulated and photos of all equipment on site that day.
- The site will be secured by staff with fencing and locks at the close of daily collection operations.

Volunteer Mobilization and Support

IF NEEDED - A list of volunteers will be created by FSCNC which includes names, email addresses, and phone numbers. This list will be used to create the volunteer schedule for each site. Prior to the event volunteers on the schedule will be contacted to remind them of their schedule day(s) and times, and to verify availability. Volunteers will check in and out with the Site Supervisor, who will track volunteer hours as an in-kind donation. The Site Supervisor will serve as a point of contact to answer questions, to assist in communicating policies regarding project operations, and ensure volunteer safety.

Site Safety

If there are any safety or security issues identified by the Site Supervisor, staff, vendors, volunteers, or residents, those concerns will be brought to the attention of the Executive Director immediately and will be communicated to the rest of the team as quickly as possible. If a substantial safety risk exists at a collection site, the Site Supervisor is responsible for closing the site to further traffic until such risk is resolved or removed.

Traffic Management

The entrance and exit point will be determined in advance to ensure minimal disruption of regular street traffic. Copies of the site plan will be provided by FSCNC to the Site Supervisor, vendors, and to the volunteers, and the plan will remain on site for the duration of this contract. FSCNC may ask CHP or other law enforcement to assist with traffic management should the Site Supervisor deem it necessary.
