**Subject:** Re: SDTAG 2019

Hi Ali

I have not responded to this until now because I was not sure how my life is going to change. I was very pleased to hear that the SDTAG is going to reconvene. Over the years I felt the input from those in the field is very important. I have been wondering if The County was just having it slowly die and go away. I was just standing in the wings waiting to see what was happening. I was prepared to continue with the chair position when ever, if at all, and to be willing to carry on.

I have retired as of 4 months ago (I am doing a little work) and in the process of reinventing my life. I am going to be out of town from the end of February thru the end of May. SO I am submitting my resignation as of now so hopefully you can find another Contractor to fill my position before March. I will let Barbara Bashall at the NCCA. know about this.

I would recommend my young son Doug Urke. Over the years he has gone past my expertise in the onsite sewage disposal and would be a great asset to the SDTAG committee from a technical and practical point of view.

Great working with you guy all these years. Alvin Urke
