Product Details

- Tough Gel-Rod™ push rod offers maximum pushing/pulling power
- Robust recording options

Great for troubleshooting lines, Gen-Eye camera systems offer all the features of a full-size camera system in a portable, compact package. Each system features an internal 512-Hz transmitter that signals the location of your camera head back to the

monitor. A 10.4" LCD color monitor displays clear pictures, while a fully waterproof keyboard allows on-screen titling.

A built-in AC/DC converter lets you operate camera systems in the field from your truck. Reels are mounted on a sturdy yet compact frame with 10" wheels for easy transport. The monitor and keyboard are contained in a padded, weather-resistant Pelican® case that stands alone or mounts on the reel.

SDW series feature an integral SD recorder that records up to 32 GB of video or images and a Wi-Fi transmitter for sending video to your smartphone or tablet. Simply download the free G-Pipe Viewer app to your Apple® or Android™ device to view and record video inspections from up to 500 feet away. Other features include an on-screen distance counter, built-in voiceover capabilities, date/time stamp, LED dimmer control, and camera test port. The self-leveling color camera automatically keeps picture right-side up as the camera glides through the line. The fully adjustable docking arm mounts onto a large-capacity reel loaded with a Gel-Rod push rod and the camera.

The included digital locator receives signals from the camera's transmitter. You'll know exactly where the problem is and how deep to dig—down to the inch. Locator features an LCD screen with clear digital readout, graphic display, digital depth indicator and battery status. Unit also emits an audible tone. Operates on six C batteries (included).

Includes: camera, reel, command module, push rod, trap skids (2, 3 and 6") and AC and DC power cords. Camera and reel have two-year warranty. Command module has one-year warranty.

Shipping: Ships motor freight.

Tech Specs:

Pipe size: 3 to 10"

Camera: self-leveling color, 2.3"L x 1.375"Dia

Lighting: 16 white LEDs; Light sensitivity: 0.5 lux
