

# RESOLUTION No. 17-450

## OF THE BOARD OF SUPERVISORS OF THE COUNTY OF NEVADA

### RESOLUTION APPROVING NEVADA COUNTY'S COMPREHENSIVE TOBACCO CONTROL PLAN FOR THE PERIOD OF JULY 1, 2017 THROUGH JUNE 30, 2018

WHEREAS, the Nevada County Public Health Department is the designated Local Lead Agency (LLA) for the Tobacco Control Program and, as such, is responsible for coordinating information, referral, outreach and education activities that promote social norm changes and educate the public about health issues related to tobacco use; and

WHEREAS, it has been recognized that:

- Smoking is the single most important source of preventable disease and premature death in California;
- More than 30 percent of coronary heart disease cases are attributable to cigarette smoking;
- More than 30 percent of all annual cancer deaths are attributable to smoking; with lung cancer now the leading cancer killer in women as well as men;
- Smoking is responsible for one-quarter of all deaths caused by fire;
- Involuntary smoking is a cause of disease, including lung cancer, in healthy nonsmokers;
- More than 80 percent of chronic obstructive lung diseases including emphysema and chronic bronchitis are attributable to smoking;
- Tobacco-related disease places a tremendous financial burden upon the persons with the disease, their families, the health care delivery system, and society as a whole; and

WHEREAS, the California Department of Public Health has allocated funds for Nevada County in the amount of \$150,000 for Fiscal Year 2017/18, and this annual one year bridge plan includes the following objectives:

- 1) Increase the number of jurisdictions with a policy of establishing a minimum package or volume size for tobacco and/or that eliminates the sale and distribution of individual small unit packages of tobacco products;
- 2) Increase the number of jurisdictions with a policy prohibiting smoking on the premise of outdoor non-recreational public areas (e.g., walkways, streets, plazas, college/trade school campuses, shopping centers, transit stops, farmers' markets, swap meets); and
- 3) Increase the degree our program has participatory collaborative partnerships with diverse youth and youth serving organizations and mobilizes their involvement in community assessments, development, implementation, and evaluation of interventions to support tobacco control-related policy, environmental, and system change; and engage them in activities that address tobacco-related determinants of health.

NOW, THEREFORE, BE IT HEREBY RESOLVED that the Board of Supervisors of the County of Nevada, State of California, approves Nevada County's Comprehensive Tobacco Control Plan for the period of July 1, 2017 through June 30, 2018.

Funds received to be deposited into revenue account: 1603-40102-492-1000/440520

PASSED AND ADOPTED by the Board of Supervisors of the County of Nevada at a regular meeting of said Board, held on the 12th day of September, 2017, by the following vote of said Board:

Ayes: Supervisors Heidi Hall, Edward Scofield, Dan Miller, Hank Weston and Richard Anderson.

Noes: None.

Absent: None.

Abstain: None.

ATTEST:

JULIE PATTERSON HUNTER  
Clerk of the Board of Supervisors

By:

Hank Weston, Chair

## Combined Scope of Work

Procurement Name: LLA 17-21 Phase I

Contract Number: CTCP-17-29

Agency Name: Nevada County Community Health

Project Name: Nevada County Tobacco Use Prevention Program

Project Type: Local Lead Agency

Contract Term: 07/01/2017 - 06/30/2018

Effective Date: 07/01/2017

Plan Version ID: 1.0

Report Generated: 07/07/2017 12:16 PM

### Objective 1

#### Objective Overview

**Objective:** By June 30, 2018, the City of Grass Valley in Nevada County, will amend their existing tobacco retail licensing policy to include an updated tobacco product definition, smoking definition and restrictions on the sale of single cigarillos and little cigars.

**Objective ID:** 1

**Primary Priority Area:** (3) Reduce the Availability of Tobacco

**Secondary Priority Area:** (1) Limit Tobacco Promoting Influences

**Is this a primary objective?** No

**Evaluation Plan Type:** Legislated Policy  Adoption Only

**Target Audience:** **Audience Group**

- 13-17 years
- 18-24 years -specifically
- Elected Officials
- Low SES
- Rural Populations
- Tobacco Retailers

**General Population Groups**

- Hispanic/Latino
- White, Non-Hispanic

#### Indicator(s)

##### Primary

**1.2.7 Minimum Package/Volume Size:** The number of jurisdictions with a policy establishing a minimum package or volume size for tobacco and/or that eliminates the sale and distribution of individual or small unit packages of tobacco products. (CORE)

##### Secondary

**3.2.12 Tobacco Product Definition:** The number of jurisdictions with a policy defining "tobacco product" to include cigarettes, smokeless tobacco, cigars, pipe tobacco, hookah tobacco, any product containing nicotine or any product used to introduce nicotine into the body, including but not limited to such things as dissolvable tobacco products and any ESD, whether or not it delivers nicotine (e.g., cigarettes, electronic pipes, electronic cigars, electronic hookah, vaping pens, mods, tanks), but excluding products specifically approved by the FDA for use in treating nicotine or tobacco dependence. ESDs do not include any battery or battery charger when sold separately.

#### Intervention Topic(s)

- Alcohol and Drug Prevention Collaboration
- Chew, Snus, Snuff Education
- Cigar/Little Cigar Education
- ENDD Education
- Key Informant Interviews
- Law Enforcement Collaboration
- Midwest Academy Strategy Chart
- Nutrition Program Collaboration
- Press release(s)
- Public Intercept Surveys
- Schools collaboration (K-12)
- Spokespersons Training
- Voluntary Health Organization Collaboration
- Volunteer Recruitment
- YouTube, Slide Share or other Multi-media Social Networking

### Intervention Activity Plan

Activity 1-7-1									
<b>Activity:</b>	Conduct 1, 2-4 hour strategic planning session with youth and adult coalition members to complete the Midwest Academy Strategy Chart for each potential target jurisdiction which will identify short, intermediate, and long term goals, organizational considerations, constituents, allies, opponents, targets, and tactics. Work with statewide grantees as appropriate to plan and prepare for the strategic planning session.

**Activity 1-4-15**

<b>Activity:</b>	Provide 10-20 gift cards that will be distributed to youth and adult coalition members who participate in key informant interviews and public opinion poll data collection, educational booth tabling events and trainings. Behavioral Modification Materials (BMMs) are provided to program participants to motivate and/or reinforce positive behavior, participation, and/or involvement in tobacco control activities and require action on the part of the recipient to receive the BMM. The cost of the BMM may not exceed \$50 in value, per person, per year, and shall not include gift cards that can be used to purchase tobacco or alcohol products. The project will be responsible for the possession, security (e.g. will keep under lock and key), and accountability of the gift cards. The project will prepare a log sheet that will track and identify each of the gift cards, value, gift card transfer date, and recipient.

**Evaluation Activity Plan**

<b>Evaluation Activity 1-E-5</b>	<b>Education/Participant Survey</b>
<b>Evaluation Activity:</b>	Tobacco Control Staff will conduct a post-survey after the spokesperson training for 4-6 coalition members to assess whether the participants gained any skills or knowledge and to determine the quality and usefulness of the training. The survey will be administered pen-to-paper and/or Survey Monkey. The results will be used to improve the future trainings and will inform the brief evaluation report. A survey instruments will be developed and/or revised by the evaluator. A possible limitation is respondent bias. Participants may want to please the training leader and may give a more favorable rating as a result.

<b>Evaluation Activity 1-E-7</b>	<b>Education/Participant Survey</b>								
Evaluation Activity:	Tobacco Control Staff will conduct a post-survey after the data collection training for 4-6 coalition members to assess whether the participants gained any skills or knowledge and to determine the quality and usefulness of the training. The survey will be administered pen-to-paper and/or Survey Monkey. The results will be used to improve the future trainings and will inform the brief evaluation report. A survey instruments will be developed and/or revised by the evaluator. A possible limitation is respondent bias. Participants may want to please the training leader and may give a more favorable rating as a result.

<b>Evaluation Activity 1-E-8</b>	<b>Focus Group</b>								

<b>Evaluation Activity:</b>	Develop a focus group guide to assess feedback on the script and message of educational public service announcement regarding the content, language, approach, and appropriateness of the action steps in the educational PSA. The focus group guide will be developed in consultation with TCEC. Conduct 2-3 focus groups other peer groups such young adults, parents, and working class, to assess the appropriateness of educational materials developed to promote minimum packaging of cigars and little cigarillos. Each focus group will include purposive sample of 3 to 6 people. Each focus group will be audio-taped and a transcription made, and an observer of the group will take notes of participant responses. A report will summarize participant responses to materials and make recommendations for revisions and/or new materials

	spokesperson trainings, public intercept surveys, key informant interview, and the media activity record. Data collection and spokesperson trainings will be assessed using a post training knowledge questionnaire. The previously gathered public intercept surveys for the Healthy Stores for a Healthy Community Campaign will be analyzed by calculating frequencies and percentages to document support/opposition to policy strategies for the Retail Environment Campaign. The public intercept survey for the minimum packaging policy campaign will also be analyzed calculating frequency and percentages to document awareness of the issues and support for a policy restricting the sale of single cigarillos and little cigars. Key informant interviews will be analyzed to summarize information and identify common themes. The media activity record will be analyzed via a content analysis of media products including but not limited to news releases, briefs, press conferences, pitch letters, stories, editorials, letters, etc. to measure the importance/public attention placed on the issue of selected objectives and the need to inform intervention strategies, campaign, and help guide local advocacy efforts.

## Narrative Summary

<p><b>Community Assessment Analysis:</b> Our project will focus primarily on rural and low-income residents. The project will focus on the geographic areas of Grass Valley. During the 2016 Communities of Excellence (CX) Needs Assessment process, Tobacco Prevention Coalition members and program staff identified Indicators 1.2.7- Minimum Package Size and 3.2.12 Tobacco Product Definition both as high priorities for Nevada County. Local retail data revealed in a second wave of surveying in a three year period that 75% of tobacco retailers surveyed sell cigarillos/little cigars as singles. During the retail data collection training and CX discussion, coalition members said that they were unaware of the proliferation of these products, especially the flavored varieties. They mentioned that the packaging on these products looks very similar to candy wrappers and must be very appealing to youth. The adult and youth coalition members attending the CX meeting believe that with the recent success of amending the TRL in Nevada City to include both Tobacco Product Definition and Minimum Package Size that continuing onto Grass Valley would be integral and effective in eliminating loopholes. They felt that this approach would have a significant impact on access, particularly youth access, and therefore use. In addition, there was a consensus that we would find the community receptive to this type of work. Coalition members and staff felt that a ban on flavored tobacco products would be more effective at limiting the sale of these products, but felt that such a policy would gain very little public or political support at this time. Coalition members noted that continued focus on educating the community about the issue, especially appeal and marketing of these products to youth is important. They also noted that the TRL passed because it was promoted as a way to limit youth access to tobacco. Thus, they felt strongly that this campaign needs to be presented in the same light in order to gain the support of local lawmakers in Grass Valley.</p> <p><b>Major Intervention Activities:</b> Intervention activities will focus on raising public awareness and building community and local law maker support. Staff will initially work to train youth and adult coalition members around the issue of flavored tobacco products, tobacco product and smoking definitions and minimum packaging restrictions. Staff and coalition members will attend community events to raise awareness of the issues and work collaboratively with key partners for additional support. Staff and coalition members will also meet with the Grass Valley Police Chief and City Council members in the targeted jurisdiction to discuss the benefits of amending the TRL to include a</p>
--

minimum packaging restriction and tobacco product definition in order to build support for the policy. Staff will also submit press releases to local media and speak on at least 1 local radio station about the campaign. Educational presentations to local organizations focused on adolescent health and youth development will help to build partnerships with key stakeholder groups, which according to the theory will increase the likelihood of success. Representatives from these organizations will be asked to participate on the adult coalition and demonstrate their support to local lawmakers and key decision-makers. Staff will also use media advocacy such as (Facebook and Instagram) in a social media campaign to raise public awareness around the issue and help set the agenda for community members and local decision makers. Strategic planning with youth and adult coalition members will allow the group to identify internal and external assets and ways in which capacity can be built to address the issues.

**Theory of Change:** The Community Organizing for Social Change theory is being used in the development and implementation of this objective. Since youth are the primary target of little cigars and cigarillos, staff will work to empower youth to take action on the issues through education, community engagement, and training on policy change and community impact. The work will focus on both leadership development with the youth, as well as policy change at the community level. The lens will be participatory rather than top-down, building both engagement and skills in the youth participating in the efforts. The goal of this approach is to catalyze the power of community members, primarily youth in this case, to work collectively to make the change they want to see in their community. Staff will serve as community educators and organizers, facilitating and supporting this process.

**Evaluation Summary Narrative:** The plan type is adoption only and therefore includes only process evaluation activities. This being the primary objective, program staff felt that this may be a lofty goal to expect the policy to be adopted and implemented in a one-year grant cycle, but with the recent adoption in the neighboring city it also seems conducive to keep the momentum moving forward on the issue. Staff also felt that by selecting to work on adoption only, more focus can be placed on process evaluation activities, which will help to inform future efforts around this indicator. Process evaluation activities specific to the indicator will help determine the level of awareness and support among community members and local decision-makers.

A public opinion poll, developed in consultation with TCEC, will be administered to community members face-to-face using paper, pencil and/or a handheld device. Frequencies and percentages will be calculated to determine the level of public awareness around little cigars and flavored tobacco products and support for a minimum packaging restriction policy. Staff will use the survey results to guide program planning and implementation. Questions will be used to gauge awareness and support/opposition of key decision-makers in targeted jurisdiction. The public intercept survey; key informant interview survey(s) and media record will be newly developed or enhanced from existing versions in collaboration with TCEC. Trainings will be held with coalition members regarding the public opinion poll data collection efforts. The public intercept survey will consist of closed and open-ended questions. Data will be analyzed using descriptive statistics for questions with numerical values and content analysis to summarize information and identify common themes. Key informant interviews will be analyzed via content analysis to summarize information and common themes. The media record will measure the importance/public attention placed on the issue of selected objectives and the need to inform intervention strategies, and help guide local advocacy efforts.

Challenges/limitations that may surface in the process of implementing this evaluation plan include the degree of familiarity and comfort of data collectors. A data collection training will allow data collectors to gain and practice the skills needed to successfully conduct intercept surveys. A BER will be written at the end of the contract term. The report will summarize all of the evaluation information collected and address achievements of the objective, effectiveness of strategies used, and recommendations for developing future project interventions. It will be written following the guidelines outlined by TCEC. The report will be disseminated to CTCP-funded agency staff. Information contained in the report will be shared with colleagues and key stakeholders.

## Objective 2

### Objective Overview

**Objective:** By June 30, 2018, the town of Truckee will adopt a policy to prohibit smoking, including the use of electronic smoking devices (ESD's), on the premise of outdoor non-recreational public areas (e.g., walkways, streets, plazas, shopping centers, farmers' markets).

**Objective ID:** 2

**Primary Priority Area:** (2) Reduce Exposure to Secondhand Smoke, Tobacco Smoke Residue, Tobacco Waste, and Other Tobacco Products

**Is this a primary objective?** No

**Evaluation Plan Type:** Legislated Policy ♦ Adoption Only

**Target Audience: Audience Group**

- 13-17 years
- Adults 18 years and older
- Business
- Elected Officials
- Employees
- Enforcement Agencies
- Government Agencies
- Rural Populations
- Tobacco Retailers

**General Population Groups**

- Hispanic/Latino
- White, Non-Hispanic

**Indicator(s)****Primary**

**2.2.9 Smoke-free Outdoor Non-recreational Public Areas:** The number of jurisdictions with a policy prohibiting smoking on the premise of outdoor non-recreational public areas (e.g., walkways, streets, plazas, college/trade school campuses, shopping centers, transit stops, farmers' markets, swap meets).

Note: Do not use this indicator, if the outdoor non-recreational public area is one of the following areas: health care campus (2.2.10), K-12 school (2.2.17), faith community campus (2.2.20), and commercial or non-profit child care facility premise (2.2.27). (CORE)

**Intervention Topic(s)**

- Facebook
- Key Informant Interviews
- Leadership Training
- Midwest Academy Strategy Chart
- Newspaper Advertising
- Opinion Editorial(s)
- Press release(s)
- Priority Population Organizations Collaboration
- Public Intercept Surveys
- Radio Advertising
- Spokespersons Training
- Voluntary Health Organization Collaboration
- Volunteer Recruitment

**Intervention Activity Plan**

Activity 2-1-1		
<b>Activity:</b>	Coordinate and collaborate with statewide tobacco control projects to obtain information, materials and technical assistance on smoke free outdoor policies. This collaboration will include work with the Tobacco Education Clearinghouse of California (TECEC), ChangeLab Solutions, the Center for Tobacco Policy & Organizing and California Youth Advocacy Network (CYAN). Monitor postings on Partners and participate in appropriate teleconferences. Identify strategies and materials that could be incorporated in the local project.

**Activity 2-4-9**

<b>Activity:</b>	Provide 10-20 gift cards to youth and adult coalition members who participate in key informant interviews, educational presentations to town council and/or Truckee Downtown Merchants Association and trainings. Behavioral Modification Materials (BMMs) are provided to program participants to motivate and/or reinforce positive behavior, participation, and/or involvement in tobacco control activities and require action on the part of the recipient to receive the BMM. The cost of the BMM may not exceed \$50 in value, per person, per year, and shall not include gift cards that can be used to purchase tobacco or alcohol products. The project will be responsible for the possession, security (e.g. will keep under lock and key), and accountability of the gift cards. The project will prepare a log sheet that will track and identify each of the gift cards, value, gift card transfer date, and recipient.

### Evaluation Activity Plan

<b>Evaluation Activity 2-E-3</b>	<b>Key Informant Interview</b>
<b>Evaluation Activity:</b>	Conduct 3 to 4 telephone and/or in-person interviews with Town Council members and Chief of Police in Truckee to determine facilitators and barriers to implementing a smoke-free downtown policy. Each interview will be approximately 20 to 30 minutes in length. The key informant interview questions will be developed in consultation with TCEC and adapted from previous samples from other project directors.

<b>Evaluation Activity 2-E-5</b>	<b>Policy Record</b>	
<b>Evaluation Activity:</b>	A public policy meeting observation form will be developed to document policymaker support/opposition, key issues raised by policymakers and City staff, and other insights from public policy meetings. Tobacco control program project staff will observe and record this information during the meetings. In addition, official policy records such as city council agendas, meeting minutes, City staff presentations, testimony, and policies enacted will be collected and coded to track: 1) support/opposition; 2) key issues that surface during the intervention, which could help shape changes to the intervention plan during the process; 3) the policy adoption process so that it can be described in the final evaluation report; and 4) to confirm adoption of a policy that meets the objective for this project.

Evaluation Activity 2-E-4	Final Evaluation Report						
<b>Data Analysis Plan:</b>	In the Brief Evaluation Report (BER) will summarize effectiveness of strategies used, and recommendations for developing future project interventions. All data sources will be summarized following the guidelines specified by CTCP and will discuss which intervention strategies were successful and why, challenges faced and how they were addressed, and recommendations for future efforts. The required public intercept surveys will be analyzed by calculating frequencies and percentages to document support/opposition to policy strategies for passing a smoke-free policy in the Town of Truckee, knowledge, and demographic information provided by survey participants. Key informant interviews will be analyzed to summarize information and identify common themes. The media activity record will be analyzed via a content analysis of media products including but not limited to news releases, briefs, press conferences, pitch letters, stories, editorials, letters, etc. to measure the importance/public attention placed on the issue of selected objectives and the need to inform intervention strategies, campaign, and help guide local advocacy efforts. Methods to disseminate findings: A summary of the report will be submitted to Partners and shared with coalition members and other programs working on Smoke-free outdoor non-recreational areas.						
<b>Methods to Disseminate Findings:</b>	Other Print Materials Partners						
<b>Other Dissemination Methods:</b>	Coalition meetings						
<b>Study Limitations or Challenges:</b>	Study limitations or challenges: There could be challenges with data collectors having enough familiarity and comfort with using the handheld devices and completing electronic store and public opinion surveys correctly. Conducting data collection discretely and without any conflicts from store owners and/or employees could be a concern. In addition, equipment/technology failure or complications may limit successfully collecting data

## Narrative Summary

<p><b>Community Assessment Analysis:</b> Our project will focus primarily on rural and low-income residents. The project will focus on the geographic areas of Truckee. During the 2016 Communities of Excellence (CX) Needs Assessment, staff and community members identified Indicator 2.2.9 as a good area for the tobacco prevention program to focus its efforts. The Tobacco Prevention Coalition acknowledged that many public areas in the downtown of two of three incorporated areas are already smoke-free, but feel that there is additional work that could be done on this front. They were unsure on local stakeholder buy-in, due to the fact that a few years prior the Tobacco Use Prevention team attempted to get a Tobacco Retail License (TRL) adopted and it was voted down by the town council as they felt the business owner guidelines in the town were not applicable to require a TRL. Currently, members and staff felt that there was room for the Tobacco Use Prevention team to work on education around these issues that may be seen as a whole health approach for the community. One area that the coalition members identified as a potential problem was enforcement of the policy once it is adopted. The CX group also felt that people are aware of the harmful effects of secondhand smoke, which will makes it easier to build support for smoke-free policies. Recently, the downtown historic areas in both Nevada City and Grass Valley adopted and implemented 100% smoke-free policies. Thus, with the current momentum and awareness around this issue, there may be a greater likelihood that the proposed policy will be adopted by the Town of Truckee. The program has identified three key supporters, Truckee Donner Recreation and Park District, Tahoe Forest Health System, and Sierra College.</p> <p><b>Major Intervention Activities:</b> Intervention activities will focus on raising public awareness and building community and local lawmaker support. Staff will initially work to train youth and adult coalition members around the</p>
--

issue of secondhand smoke and other tobacco products that are harmful to youth, and why creating smoke-free environments can reduce chronic diseases. Staff and coalition members will attend community events to raise awareness of the issues and work collaboratively with key partners for additional support. Staff and coalition members will also meet with the police chief and town council members in the targeted jurisdiction to discuss the benefits of creating a tobacco-free downtown, walkways, shopping plazas and street fairs. Staff will also submit 1-2 opinion editorials to local media about the campaign.

**Theory of Change:** The Ecological Perspective will be applied to focus and organize this work for this objective. This intervention will not address all levels of this theory, but the Ecological Perspective will inform our overall approach. As the work is likely to continue into the future on this objective, the Ecological Perspective's full lens can be utilized in the future. This theory acknowledges the importance of the interaction between a multiple tiers of our environment's system and the interdependence across those factors. The work in this year's plan will focus on the higher level tiers, while acknowledging the multiple levels of influence, including social norms and individual behavior. This theory will inform the framing of the media engagement, as well as the conversations with key stakeholders, particularly around problem definition, community norms and reciprocal causation.

**Evaluation Summary Narrative:** The plan type is "adoption only" and therefore includes only process evaluation activities. Staff also felt that by selecting to work on exploration and planning, more focus can be placed on process evaluation activities, which will help to inform future efforts around this indicator. Process evaluation activities specific to the indicator will help determine the level of awareness and support among community members and local decision-makers.

Evaluation data collection will consist of 1) a public opinion survey, 2) key informant interviews, and 3) a media record. A public opinion survey, developed collaboratively by staff and coalition members, as well as in consultation with TCEC, will be administered to community members a link to an on-line survey or a handheld device. Frequencies and percentages will be calculated to determine the level of public awareness and interest around secondhand smoke in non-recreational public areas. Staff will use the survey results to guide program planning, future campaign organization and implementation. Survey design will be focused on collecting data that will allow us to gauge awareness and support/opposition of key decision-makers and community at large in targeted jurisdiction. The public intercept survey, key informant interview(s), and media record will be newly developed or enhanced from existing versions in collaboration with TCEC. Trainings will be held with coalition members regarding the evaluation data collection efforts. The public intercept survey will consist of closed and open-ended questions. Data will be analyzed using descriptive statistics for questions with numerical values and content analysis to summarize information and identify common themes. Key informant interviews will be analyzed via content analysis to summarize information and common themes. The media record will measure the importance/public attention placed on the issue of selected objectives and the need to inform intervention strategies, and help guide local advocacy efforts.

Challenges/limitations that may surface in the process of implementing this evaluation plan include the degree of familiarity and comfort of data collectors. A BER will be written at the end of the contract term. The report will summarize all of the evaluation information collected and address achievements of the objective, effectiveness of strategies used, and recommendations for developing future project interventions. It will be written following the guidelines outlined by TCEC. The report will be disseminated to CTCP-funded agency staff. Information contained in the report will be shared with colleagues and key stakeholders, and be leveraged to support the community organizing for social change work.

## Objective 3

### Objective Overview

**Objective:** By June 30, 2018, at least 5 Nevada County youth coalition members will be recruited, educated, sustained and trained as leaders and spokespersons to implement program objectives and advance tobacco control efforts; and at least 50% will participate in a minimum of 3 community engagement activities such as conducting observations, public opinion surveys, collecting endorsements and making presentations to the community and decision makers.

**Objective ID:** 3

**Primary Asset:** (2.4) **Youth Engagement in Tobacco Control:** The degree our program has participatory collaborative partnerships with diverse youth and youth serving organizations and mobilizes their involvement in community assessments; development, implementation, and evaluation of interventions to support tobacco control-related policy, environmental, and system change; and engages them in activities that address tobacco-related determinants of health.

Is this a primary objective? No

**Intervention Activity Plan**

<b>Activity 3-11-1</b>		
<b>Activity:</b>	Collaborate with statewide and other CTCP funded projects to provide 1-2, 60-90 minute social media trainings with 6-10 youth and adult coalition members and representatives from community serving organizations. Trainings will include but not be limited to the following topics: basics of social media, social media tools, and a strategy session to create a social media plan. Trainings will be provided using any of the following method(s): in-person, webinar and/or internet-based.	
<b>Intervention Category:</b>	Training/Technical Assistance Activities	
<b>Copyright:</b>	No	
<b>Program Deliverable Percentage:</b>	2.50 %

<b>Activity 3-3-2</b>		
<b>Activity:</b>	Disseminate 15-20 youth coalition orientation packets. Packets will be given to students during recruitment presentations and will be promoted via word of mouth as well as through referrals from school counselors, and teachers. Packets will include an orientation letter, materials, brochures and a coalition time-line of activities for the year.

### Evaluation Activity Plan

<b>Evaluation Activity 3-E-1</b>	<b>Education/Participant Survey</b>	
<b>Evaluation Activity:</b>	Using an online survey, Evaluator will update the previous coalition satisfaction survey to reflect current objectives. The Tobacco Control Evaluation Center (TCEC) will be used as a resource in creating the coalition satisfaction survey. All coalition members will be surveyed every 12 months. Results will be summarized and used to improve Coalition functioning, meetings, trainings, and technical assistance services.

<b>Evaluation Activity 3-E-3</b>	<b>Final Evaluation Report</b>	
<b>Data Analysis Plan:</b>	<p>The Brief Evaluation Report (BER) will summarize findings from an annual coalition satisfaction survey, focus groups and a comprehensive youth activity tracking log. Program staff will conduct an annual satisfaction survey with participating youth, by collaborating with TCEC. This survey will compile a complete analysis report and provide local recommendations for current and future efforts. Focus groups question will be conducted with high school youth coalition members and middle school Club Live members that participate in tobacco advocacy activities. Focus group questions will focus on a variety of topics, including quality of youth meetings/trainings, reasons for involvement, and skills/experiences gained. Staff will consult with TCEC in the development of the survey instrument. Focus group results will help staff identify what went well over the year and where engagement and recruitment strategies can be improved. Staff will recruit at least 6 youth to participate in the focus group. The comprehensive tracking log will track youth involvement over the year to establish turn-over and retention rates. The log will also track youth activities and trainings, with specific details on the types of activities and training topics. Through a content analysis of the tracking log, staff will be able to identify possible reasons for more or less youth involvement and make adjustments to the program in order to increase and sustain youth interest in tobacco advocacy efforts. A Brief Evaluation Report will be written at the end of the contract term. The report will summarize all of the evaluation information collected and address achievements of the objective, effectiveness of strategies used, and recommendations for developing future project interventions. It will be written following the guidelines outlined by TCEC. The report will be</p>	

	disseminated to CTCP-funded agency staff. Information contained in the report will be shared with colleagues.	
<b>Methods to Disseminate Findings:</b>	Other Print Materials Presentations	
<b>Other Dissemination Methods:</b>		
<b>Study Limitations or Challenges:</b>	Collecting surveys from the youth members at the end of a school year can be challenging with all the other end of year school testing and activities. Choosing a date that is not too far at the end of the school year is important to have maximum participation from the coalition members.

## Narrative Summary

<p><b>Community Assessment Analysis:</b> The project will focus on youth and young adults aged 11-19. The project will focus in western Nevada county. During the Communities of Excellence (CX) Needs Assessment process, youth and adult coalition members rated Asset 2.4 and 2.5 as Excellent (5). Nevada County's tobacco youth and adult coalition has been in existence for over 15 years and has a history of engaging youth on a variety of projects, from smoke-free parks to Tobacco Retail Licensing (TRL). In the past few years, the Tobacco Project Director has begun to merge the adult and youth coalitions together, as this was a recommendation by the active members, youth and adults of the coalition. Although the program currently maintains a highly active and engaged tobacco coalition, during the CX process it was strongly noted by youth and adult coalition members that the program will need to recruit all new members for the coalition. Everyone felt that it is very important for the program to continue involving youth as they and their peers are the ones being targeted to be the next generation of tobacco users. Youth have a strong connection to what the new and upcoming trends in tobacco use and or resilience to these products are. It is important that we continue to recruit a diverse group of community members in tobacco prevention efforts.</p> <p><b>Major Intervention Activities:</b> Intervention activities will focus on expansion and recruitment, of youth and in community-based tobacco prevention and advocacy efforts. Staff will coordinate with schools and community groups to recruit new members and hold regular coalition meetings with youth. Recruitment materials, including flyers and brochures, and new member orientation packets will be developed and disseminated. Trainings for recruited coalition members will focus on a variety of skill and capacity building activities such as (spokesperson, media relations, letter writing, PSA creation, and social media advocacy.</p> <p><b>Theory of Change:</b> A Community Organizing Theory of Change is being used in the development and implementation of this objective. Youth, the population most targeted by the tobacco industry, will be empowered along with key-adult community members to build youth and adult partnerships, in order to take action in their communities by advocating for tobacco policies and social norm changes that reduce youth tobacco use and minimize youth access to tobacco products. Staff will provide youth with education and resources that will enable them to identify tobacco related issues in their schools and communities. Trainings will provide youth with the skills they need to take action and build peer and public support.</p> <p><b>Evaluation Summary Narrative:</b> Evaluation activities will include an annual participant satisfaction survey, a focus group with participating youth and adult coalition members, and a comprehensive tracking log of youth involvement. This survey will compile a complete analysis report and provide local recommendations for current and future efforts. Focus group questions will focus on a variety of topics, including quality of meetings/trainings, reasons for involvement, and skills/experiences gained. Staff will consult with TCEC in the development of the survey instrument. Focus group results will help staff identify what went well over the year and where</p>

engagement and recruitment strategies can be improved. Staff will recruit 4-6 coalition members to participate in the focus group. The youth-coalition attendance and participation records will be analyzed to determine attendance/participation patterns and changes in attendance/participation rates. A summary of the attendance information and participation in Youth Opposing the Use of Tobacco for Health (Y.O.U.T.H) coalition activities will be provided along with an analysis of youth engagement in project activities. A BER will be written at the end of the contract term. The report will summarize all of the evaluation information collected and address achievements of the objective, effectiveness of strategies used, and recommendations for developing future project interventions. It will be written following the guidelines outlined by TCEC. The report will be disseminated to CTCP-funded agency staff. Information contained in the report will be shared with colleagues.
