PROJECT APPLICATION**County of Nevada, Agriculture Department****I. Project Overview (FAC 7272.5)**

Project Goals and Objectives (check all that apply):

- Increase the profitability and value of crop land and rangeland
- Decrease the costs of roadside, park, and waterway maintenance
- Reduce the fire hazard and fire control costs in the state
- Protect the biodiversity of native ecosystems
- Maintain the recreational and aesthetic value of open space, recreational, and public areas
- Increase water supply and flow

Project Activities (check all that apply):

- Operation of programs by the county agricultural commissioner for control of noxious weeds along county roads and other local government owned property
- Matching funds for control of noxious weeds on city owned streets, parks, rights-of-way, and other public areas
- Disseminating biological control agents by the county agricultural commissioner for the long-term control of yellow starthistle or other noxious weeds
- Abatement of noxious weed infestations on land vital to the success of the program

II. Project Plan

Weed Species to be Controlled: Weeds species to be controlled will be limited to weeds defined within the California Code of Regulations 4500 list as well as those weeds listed on the December 2019 Nevada-Placer Weed Management Area Priority Invasive Plant List.

Methodology: Sites will be mapped and tracked in the field by County Department of Agriculture Staff utilizing Android devices and Calflora's ObserverPro app, which has been the tool of choice for the department for the last 6 years. CDFA's weed monitoring protocol will be followed, measuring the cover of weeds or counting individual plants when feasible. Each historical and newly discovered site will automatically have a log created in Calflora to track the historical level of infestation. Additional data will also be collected and will include, date, location, site ownership, net/gross acres infested, number of plants, treatment method, and type of herbicide applied (if applicable). This log will be updated during or after every site visit to reflect the level of eradication that has been achieved. County Department of Agriculture Staff will survey all previously known infestation sites within the project area. Surveys will continue to be done outside the known infestation sites to determine the possible spread of the targeted invasive and noxious weed species listed above. County Department of Agriculture Staff will treat all known infestations and any new detections of targeted noxious weeds on public and private property within the project area as appropriate.

This grant proposal also includes the purchase of one Skid Sprayer valued at an estimated cost of \$4,500 as well Hand Tool kits valued at an estimated cost of \$350. Both the Skid Sprayer and the Hand Tool kits aid in the abatement of noxious weed infestations on land vital to the success of the program as the Skid Sprayer will be utilized to apply herbicides for control of noxious weeds. The Hand Tool kits will be utilized by repairing and maintaining equipment vital to the treatment of noxious weeds.

As the lead agency for this project, the Nevada County Agriculture Department will meet CEQA compliance by filing a notice of exemption under 14CCR §15307 (Actions by Regulatory Agencies for Protection of Natural Resources) and 14CCR §15308 (Actions by Regulatory Agencies for Protection of the Environment).

Location(s): The County of Nevada, California, excluding areas already undergoing treatment that are covered under other grants or contracts. See attached map.

Weed Removal/Control Techniques(s): The project will utilize an Integrated Pest Management (IPM) approach with a focus on long-term prevention, correct pest identification, and the use of combined management approaches such as mechanical and physical controls (i.e. weed wrenches, shovels, loppers, chainsaws, and hedge trimmers). Pesticides will only be used when needed and will be selected and applied in a way that will minimize the possible harm to people and the environment. Pesticides will only be used by properly trained staff and applied in accordance with specific local conditions and those uses allowed by the label. The list of herbicides that is expected be used include: Telar XP, Capstone, and an appropriate surfactant and dye.

Potential challenges include unfavorable weather conditions which may delay treatments, especially at higher elevations. This is unavoidable and dependent on seasonal climate. Challenges could also include gathering permission from private landowners as some homes and properties are not a primary residence. The County Agriculture Department may work in cooperation with local environmental groups such as the Nevada County Resource Conservation District, Nevada Placer Weed Management Area, and the Truckee River Watershed Council to provide educational and outreach information to concerned citizens and landowners to overcome this challenge.

III. Reporting

Grant recipients will be required to submit a mid-year report to CDFA documenting a visual representation of the project's progress on September 1, 2021.

Final project reports are required 30 days after project completion, no later than July 31, 2022. Final project reports should include detailed information on project results and include photos of field work showing progress (before/after photos).
