Appeal of The Granting of Sequoia Developments Services Inc's
Application for a Conditional Use Permit, CUP23-0015

It is respectfully submitted that this appeal of the granting of the above-referenced Conditional Use Permit should be granted, and the application for the Conditional Use Permit should be denied in its entirety, upon the following grounds:

1. Granting the Conditional Use Permit would not only violate Sec L-II 3.8 of the Land Use and Development Code of the County of Nevada, it would inflict upon the appellant the precise types of adverse impacts which that section of the Code was specifically enacted to prevent.
2. Sequoia and Verizon have wholly failed to submit any probative evidence, whatsoever, to establish any actual need for the facility, in the absence of which Sec. L-II 3.8(D)(I) prohibits the granting of such application.
3. The installation of the proposed thirteen-story cell tower will inflict substantial albeit wholly unnecessary adverse impacts upon the appellant's real property, in direct violation of the requirements of the Code.
4. Sequoia and Verizon have wholly failed to establish that the granting of the application would comply with the requirements of Sec. L-II 3.8(E)(1), in the absence of which the application cannot be granted.
5. The applicant has failed to establish that its proposed siting of the proposed tower would minimize the number of towers needed to provide coverage within the County, or would minimize the adverse visual impact of the tower, both of which are required under SEC L-II 3.8(E)(1).
6. The submissions submitted by the applicant are inherently defective, as a matter of law, and cannot serve as a basis for the County to grant the Conditional Use Permit.
7. The irresponsible placement of the proposed tower less than 500 feet from the appellant's property would not only inflict a severe adverse aesthetic impact upon the appellants home, but will inflict a substantial loss to the financial value of the appellant's home, both of which are entirely unnecessary.
