Nevada County Board of Supervisors

950 Maidu Avenue

Nevada City, Ca. 95959

Honorable Supervisors,

As you are aware, the California Building Standards Commission adopts a new and updated version of the California Fire Code every three years. It is then the responsibility of local governments to adopt the code and make any modification or amendments to it that address local concerns. In the current cycle the Chief Building Official of Nevada County, Mr. Craig Griesbach, has been working with the local county Fire Districts to craft a package of amendments to the state code that address these concerns and provide uniformity throughout the county. This provides consistency for all related industries and makes the plan approval and building process more efficient for all concerned.

It is our opinion that the proposed California Fire Code adoption before you on the next Board of Supervisor's agenda is inclusive to the fire agencies concerns and needs relative to fire and life safety in our community. We support this adoption and encourage you as well.

Please feel free to contact me should you wish to discuss this further

Respectfully,

Chief Jerry Good,
President of the Nevada County Chiefs Association
