Subject: Citizen concern re. PG&E PSPS
Date: Monday, September 23, 2019 3:06:14 PM

Hello Board of Supervisors,

The following comment was received on the Nevada County Public Works Facebook page at https://www.facebook.com/nevcopwsocial/posts/2509694079114320?comment_id=2510136922403369 and is being forwarded for your information:

Ren Homick Please do what you can to stop PG&E. The ground is still damp in NC from two days of steady rain last week and 6-7mph breezes are gentle, not extreme weather. So very many citizens in our lovely county are feeling deceived, manipulated and harassed by this new practice of PG&E for what are clearly NOT extreme weather conditions. Can you help? Will you help?

County of Nevada Public Works We will forward your concern to the Board of Supervisors who have heard similar concerns. At the same time, you may wish to contact your State representatives.

Ren Homick TY

Sincerely,

Trisha M. Tillotson, P.E.
