Hello,
My name is Tara Kelly from Grass Valley, 10228 Durbrow Rd.

Some exercise studios are allowed open in phase 2. Why aren't the small gyms not in phase 2 also? These gyms are willing to follow guidelines and people are needing and wanting to get back on track. Fitness is essential to health. We are not the "big box" gyms and need to open asap.

Thank you

Julie Patterson-Hunter

Can you please talk about the recovery rate and the actual people that have died in Nevada County. Does this justify shutting down the local economy? Also can you talk about the accuracy, inaccuracy and false positives of the PCR test and other tests.

To your wellness,
Kalub Jarosh

New eComment for Nevada County Board of Supervisors May 26, 2020 meeting Agenda

Penelope Sullivan submitted a new eComment.

Meeting: Nevada County Board of Supervisors May 26, 2020 meeting Agenda

Item: PUBLIC COMMENT: 9:01 A.M.

eComment: I am deeply opposed to the continued order to shelter in place as continuing to so is putting our community at increased risk for negative ramifications. Our businesses are struggling. We have had two teen suicides and one attempt. Studies show that social isolation has negative impacts psychologically..as well as economically. There is NO justification for this. We must take this into account

Hi, my name is Penelope Sullivan. And I've been a resident of Nevada County for twenty-three years and I am speaking in reference to your entire approach to The Cove in nineteen situation. I think that it's very valuable to take note of how new moon in Truckee has life bonded to the mask-wearing for their employees, which is that the scientific studies shown show that a the the Micron size of the virulence is so small that most mask will provide very little actual genuine protection from spread of disease and to actually offer more importantly that there have been very very few studies done on healthy people wearing masks and that it has been brought up wage. Physics studies do show that mask-wearing and healthy individuals can actually impede their immunity by decreasing their oxygen levels, especially for those that wear them for an eight-hour shift for five to seven days a week and that we are in fact and then actually increases through that lessening of oxygen it not only wage increases their immune activity, but it does also increase stress which that of itself decreases immune activity also with the cotton masks off the moisture can Harbor disease more readily and this is all shown by scientific data. And so there is a deep concern from many of us within the community that the requirement of and actually it's not a requirement and I feel that that is for so people cannot be sued wage. A very strong recommendation which borderlines on requirement without the legal stipulation and that there are many people within the community that are very concerned about how we are supporting our workers with their health and we are setting themselves up for Respiratory illness by requiring recommending these masks. So I asked that we are open to looking at this scientific studies. We're open to looking at this in reference to Children going to public schools and teachers being in school that we draw upon the holistic health models. There are plenty of holistic and he's more than ever before in my career. I have been in the holistic health field for over 25 years more than ever before are medical doctors that actually have education in holistic knowledge

Hello, this is Penelope Sullivan again. And as I said, I've been president for twenty-three years. My also deeply concerned about the psychological ramifications of social distancing this in my mind and a some epidemiologist and doctors have said is becoming a a crime against humanity in that. We do not know how long we have never studied socialized civilization for a long-term setting and healthy individuals. The information that we do see is that it actually there are definite psychological implications in our community. We have had two teenage suicides with a 3rd attempt and a fourth call in this is there has been a 600% suicide increase since this has begun a response to that and so we must take this Thursday. And as we continue to state that we must socially distance be except for our families. My biggest question is how are we going to develop antibodies and exposure to this then if we do this, there are many of us. We are one of the least vaccinated communities and we are not even in the face of this going to accept vaccinations as a mode of working with this situation. We both are stepping forward to ask that the holistic health model can be represented as opposed to our very disease oriented health model. Thank you.

Hi there,

I am the owner of the Anytime Fitness in Grass Valley and looking for a possible date to be allowed to re-open (phase 3) and the requirements to reopen that pertains to my type of business.

We are already prepared to follow the social distancing and additional cleaning regimen. Our facility is small, about 4800 sq feet and we are willing to what ever it takes to be allowed to open.

Thanks
Sharon Dunn
