Scope of Project

Handheld Radios:

NCSSAR will purchase one hundred (100) new handheld radios to replace their current outdated ones. NCSSAR will also be acquiring a further sixty (60) handheld radios to keep in a cache for issue to outside agency law enforcement mutual-aid personnel who arrive on-scene, but because of interoperability challenges cannot utilize their own radio communications gear. Five (5) "Pelican" style ruggedized cases will be purchased to store the cache of handheld radios to protect them from damage and the elements.

Mobile Vehicle Radios:

Fifteen (15) of NCSSAR's vehicle mounted mobile radios will be replaced and upgraded with the latest VHF GPS enabled equipment. NCSSAR will also acquire four "Quad Band" mobile radios for their rescue trucks, which will alleviate many of the challenges encountered with interoperability. Project includes installation and necessary accessory equipment.

Expansion of ROIP Repeater/Interoperability System:

NCSSAR will purchase Radio Over Internet Protocol (ROIP) equipment to be installed at twenty (20) separate locations throughout Nevada County where current radio capabilities are either highly degraded or non-existent. These sites will be specifically chosen to enhance NCSSAR's ability to communicate when communications are degraded such as during a Public Safety Power Shutoff. Project includes installation and necessary accessory equipment.
