Contractor shall be responsible for all reports and obligations including but not limited to: social security taxes, income tax withholding, unemployment insurance, disability insurance, workers' compensation and other applicable federal and state taxes.

This provision is not intended to create any cause of action in favor of any third party against either Party or to enlarge in any way either Party's liability but is intended solely to provide for indemnification of the Indemnified Party from liability for damages, or injuries to third persons or property, arising from or in connection with Indemnifying Party's performance pursuant to this Contract. 4. **"PII"** is personally identifiable information that is obtained through the MEDS or IEVS on behalf of the programs and can be used alone, or in conjunction with any other reasonably available information, to identify a specific individual. The PII includes, but is not limited to, an individual's name, social security number, driver's license number, identification number, biometric records, date of birth, place of birth, or mother's maiden name. The PII may be electronic, paper, verbal, or recorded.
5. **"Security Incident"** means the attempted or successful unauthorized access, use, disclosure, modification, or destruction of PII, or interference with system operations in an information system which processes PII that is under the control of the contractor, county or county's Statewide Automated Welfare System (SAWS) Consortium, or under the control of a contractor, subcontractor or vendor of the county, on behalf of the county.
6. **"Secure Areas"** means any area where:

authorized or required by law, such as a court order, or are made with the explicit written authorization of the individual, who is the subject of the PII, are allowable. Any other use or disclosure of PII requires the express approval in writing to County. No Contractor staff shall duplicate, disseminate or disclose PII except as allowed in the Agreement.

Safeguards shall include administrative, physical, and technical safeguards appropriate to the size and complexity of the Contractor's operations and the nature and scope of its activities. Contractor will provide County with information concerning such safeguards as County may reasonably request from time to time.
4. Workforce member training shall be documented and such documents retained for three years beyond the end of this contract and made available to County for inspection if requested.

More thorough screening shall be done for those staff who are authorized to bypass significant technical and operational security controls.

Background screening documentation shall be retained for each staff for a period of three (3) years following termination of this Agreement.

7. Secure all areas of facilities where Contractor staff use, disclose or store PII including:
 - a. Ensure procedures and controls are in place to promptly revoke access to the facility from terminated employees.
 - b. Store paper records with PII in locked spaces, such as locked file cabinets, locked file rooms, locked desks or locked offices.
 - c. Using all reasonable measures to prevent non-authorized personnel and visitors from having access to, control of or viewing PII.

 - i. Properly coded key cards

- ii. Authorized door keys
 - iii. Official Identification
- 8. Secure all devices which are used to access PII including:
 - a. Encrypted workstations, laptops, mobile devices and removable media using FIPS 140-2 certified algorithm 128 bit or higher, such as Advanced Encryption Standard (AES). The encryption system must be full disk. It is encouraged, when available and when feasible, that the encryption be 256 bit.
 - b. Encrypt electronic files containing PII when stored on any mobile device or removable media to same standards as above.
 - c. Install and actively use antivirus software solutions on all workstations, laptops and other systems which process and/or store PII.
 - d. Apply all critical security patches within thirty (30) days of vendor release to all workstations, laptops or other systems which process and/or store PII.

 - f. Destroy all PII that is no longer needed using a method consistent with NIST SP800-88, Guidelines for Media Sanitation, such that the PII cannot be retrieved.
 - g. Servers containing unencrypted PII must have sufficient administrative, physical, and technical controls in place to protect that data, based upon a risk assessment/system security review. It is recommended to follow the guidelines documented in the latest revision of the National Institute of Standards and Technology (NIST) Special Publication (SP) 800-53, Security and Privacy Controls for Federal Information Systems and Organizations.
 - h. Only the minimum necessary amount of PII required to perform required business functions may be accessed, copied, downloaded, or exported.
- 9. Contractor may ensure its compliance with the following administrative, technical and physical safeguards through the system that it obtains access to PII, including County's Statewide Automated Welfare System Consortium, C-IV Consortium, with prior verification and approval of County:
 - A. Critical security patch management must be applied on all workstations, laptops and other systems, which process and/or share PII with system reboot if necessary. There must be a documented patch management process that determines installation timeframe based on risk assessment and vendor recommendations. At maximum, all applicable patches deemed as critical are installed within thirty (30) days of vendor release.
 - B. All contract workforce members and employees must be issued a unique user name for accessing PII which are promptly disabled, deleted, or the password changed upon the transfer or termination of an employee within twenty-four (24) hours. The following provision shall apply:
 - a. Passwords are not shared.

 - c. Passwords must be a non-dictionary word.
 - d. Passwords must be stored in readable format on the computer or server.
 - e. Passwords must be changed every ninety (90) days or less.
 - f. Passwords must be changed if revealed or compromised.
 - g. Passwords must be composed of characters from at least three (3) of the following four (4) groups from the standard keyboard:
 - i. Upper case letters (A-Z)
 - ii. Lower case letters (a-z)
 - iii. Arabic numerals (0-9)
 - iv. Special Characters (!, @, #, etc.)

- C. When no longer needed, all PII must be cleared, purged, or destroyed consistent with NIST SP 800-88, Guidelines for Media Sanitization, such that the PII cannot be retrieved.
- D. The systems providing access to PII must provide an automatic timeout, requiring re-authentication of the user session after no more than twenty (20) minutes of inactivity.
- E. The systems providing access to PII must display a warning banner stating, at minimum that data is confidential, systems are logged, system use is for business purposes only for authorizes users and users shall log off the system immediately if they do not agree with these statements.
- F. The systems which provide access to PII must maintain an automated audit trail that can identify the user or system process which initiates a request for PII, or alters PII.

The audit trail i) be date and time stamped, ii) log both successful and failed accesses, iii) be read-access only and iv) be restricted to authorized users. Databases that store POII shall have database logging functionality that is enabled and audit trails shall be retained for three years beyond the end of this contract and made available to County for inspection if requested.

- G. The system providing access to PII shall use role-based access controls for all user authentications, enforcing the principle of least privilege.
- H. All data transmissions of PII outside of a secure internal network must be encrypted using a Federal Information Processing Standard (FIPS) 140-2 certified algorithm that is 128 bit or higher, such as Advanced Encryption Standard (AES) or Transport Layer Security (TLS). It is encouraged, when available and when feasible, that 256 bit encryption be used. Encryption can be end to end at the network level, or the data files containing PII can be encrypted. This requirement pertains to any type of PII in motion including website access, file transfer and email.
- I. All systems involved in accessing, storing, transporting, and protecting PII, which are accessible through the Internet, must be protected by an intrusion detection and prevention solution.
- J. Contractor must ensure audit control mechanisms are in place. All systems processing and/or storing PII must have at least an annual system risk assessment/security that ensures administrative, physical, and technical controls are functioning effectively and provide an adequate level of protection. Reviews should include vulnerability scanning tools. All systems processing and/or storing PII must have a process or automated procedure in place to review system logs for unauthorized access. All systems processing and/or storing PII must have a documented change control process that ensures separation of duties and protects the confidentiality, integrity and availability of data. When the Contractor, County or DHCS suspects MEDS usage anomalies, the Contractor will work with the County or DHCS to investigate the anomalies and report conclusions of such investigations and remediation to County.
- K. Contractor must establish a documented plan to enable continuation of critical business processes and protection of the security of PII kept in an electronic format in the event of an emergency. Emergency means any circumstance or situation that causes normal computer operations to become unavailable for use in performing the work required under this Agreement for more than twenty-four (24) hours. Data centers with servers, data storage devices, and critical network infrastructure involved in the use, storage and/or processing of PII, must include environmental protection such as cooling, power, and fire prevention, detection, and suppression. Contractor shall have established documented procedures to backup PII to maintain retrievable exact copies

of PII. The documented backup procedures shall contain a schedule which includes incremental and full backups. The procedures shall include storing backup's offsite. The procedures shall ensure an inventory of backup media. Contractor shall have established documented procedures to recover PII data which shall include an estimated amount of time needed to restore the PII data.

10. The PII in paper form shall not be left unattended at any time, unless it is locked in a file cabinet, file room, desk or office. Unattended means that information may be observed by an individual not authorized to access the information. Contractor shall have policies that include, based on applicable risk factors, a description of the circumstances under which the contractor staff can remove and/or transport PII from the Contractor's premises for identified routine businesses purposes only, as well as the physical security requirements during transport. This should be included in training due to the nature of the risk.

Visitors to areas where PII is contained shall be escorted, and PII shall be kept out of sight while visitors are in the area. PII must be disposed of through confidential means, such as cross cut shredding or pulverizing. The PII must not be removed from the premises of Contractor, except for identified routine business purposes or with express written permission of County.

Mailings that include five hundred (500) or more individually identifiable records containing PII in a single package shall be sent using a tracked mailing method that includes verification of delivery and receipt.

11. Take prompt corrective action in the event of any security incident or any unauthorized use or disclosure of PII to cure any such deficiencies and to take any action required by applicable federal and state laws and regulations.
12. Report to County any security incident or any unauthorized use or disclosure of PII (in any form. Contractor shall make this report immediately upon the discovery of the use, disclosure, or security incident. Any unauthorized use or disclosure or security incident shall be treated as discovered by Contractor on the first day on which such use or disclosure or security incident is known to the Contractor, including any person, other than the individual committing the unauthorized use or disclosure or security incident, that is an employee, officer or other agent of the Contractor, or who should reasonably have known such unauthorized activities occurred.

To direct communications regarding any security incident, the Contractor shall initiate contacts as indicated herein.
