He reviewed the background of the Project, and provided an overview of the County's process.

Mr. Foss provided a description of the Nevada County Commercial Cannabis Cultivation Ordinance for Medical Use, reviewed the intent and scope of the Ordinance, and reviewed the definitions. He explained zoning classifications for personal use cultivation, medical use cultivation, and commercial use. He listed the standards and provisions for cultivation area requirements including: site security; health safety and welfare of neighboring properties; conform to applicable codes; conform to hazardous materials regulations; visibility requirements; conform to applicable County ordinances; property owner; required permits; wastewater disposal system; and indoor odor control. Accessory structure requirements include permitting and setback requirements; requirements for a permanent electrical source; odor control requirements for indoor cultivation; and a requirement for cultivation areas to be fully enclosed.

Mr. Foss explained that the required permits include 1) cannabis cultivation permit; 2) administrative development permit; and 3) annual cannabis permit. Application submittal requirements include a detailed site plan, biological pre-screening information; cultural resources report; water, sewer and electrical sources; notes on plans; security plan; light control plan; and secondary access information.
