## Nevada County Veterans Affairs

### Section A: Statement of Need

Nevada County is located in the Sierra Nevada foothills of California with a person per square mile rate of 103, compared to 251 in California. The rural population of 99,814 lives across a 974-square-mile region that spans from the foothills, over the Sierra Nevada's and extending east to the California/Nevada border. The three incorporated cities (Nevada City, Grass Valley, and Truckee) comprise approximately 32,000 residents, leaving more than 66,000 persons living in very rural areas. Veterans comprise more than 8.6% of the county population.

According to the 2018 VetPop data, there are 8,048 Veterans calling Nevada County home, of which 5% are WW II Veterans, 59% Korean / Vietnam War Veterans, 13% Peacetime Veterans and 23% Gulf War Veterans. The 2019 Housing and Urban Development (HUD) Point In Time count identified 34 homeless Veterans within Nevada County. According to the Substance Abuse and Mental Health Services Administration, 20 to 25% of the homeless population in the United States suffers from some form of severe mental illness.

The majority of Nevada County residents live 60-90 miles from the closest VA Medical Center. A small VA outpatient clinic in Auburn, CA is located 30 miles from Grass Valley. This clinic is where the majority of our Veterans are seen for their primary care and where only a single psychologist is available. The clinic is associated with the Mather VA Medical Center, which is 56 miles away. Traveling to this location during the winter months is complicated due to chain controls or road closures.

Mental Health services for combat Veterans are seen by a therapist in Grass Valley through a contract with the Citrus Heights Vet Center. These services are provided for a period of one year, unless the Veteran receives a disability rating for PTSD during that timeframe. When the Veteran receives a rating, they are then required to receive treatment through the VAMC at Mather. If the Veteran has a military related mental health trauma which is not due to combat, the Veteran will not be provided service through the Vet Center but will instead be referred to the VA clinic.

Welcome Home Vets (WHV) is a non-profit organization that provides mental health services through contracted licensed-therapists and serves Veterans in the Nevada County area. These therapists are competent in both military culture and in treatment of military related psychological trauma. This support service allows Veterans to continue receiving treatment in Nevada County. Family members can also receive free mental health services, including individual, group, and supervised peer-support therapy. WHV also provides education to the community on military related trauma through agencies such as faith-based organizations, the court system, junior college system and the Community Support Network, a non-profit collaborative.

The Nevada County VSO received the Prop 63 Grant in 2018/2019 and partnered with WHV to provide free quality mental health services to 38 Veterans in the county. Nevada County is also a recipient of Prop 63 funding for Fiscal Year 2019/2020 and has provided services to 28 Veterans to date.

### Section B: Proposed Service/Project

Immediately upon separating from military service, many Veterans focus on providing for their family, starting a new career or continuing their education. During this new journey, many Veterans fail to file for benefits or seek treatment for the psychological trauma they experienced during their service. For some Veterans in Nevada County, it has been 30 years or more since they left the military. This same group of Veterans are just now coming to terms with their service and are seeking benefits and treatment.

The purpose of Welcome Home Vets is to work to educate all Veterans and family members during their transition, link them to services and improve the mental health and well-being of all Veterans in Nevada County. The key to success is increasing outreach and referrals to mental health services. The service will continue to meet this purpose by:

1. Ensuring the public knows the mission of the organization and sees the active promoting of services and mental health treatment.

2. Identifying more minority and underrepresented Veterans that may need support in Nevada County.
3. Continuing and expanding their existing program to eliminate Veteran homelessness.
4. Increasing the collaboration among non-profits and government agencies serving Veterans.
5. Continuing a peer model support system.

The Nevada County VSO, in partnership with Welcome Home Vets, Sierra College, multiple divisions of Nevada County Department of Social Services (DSS), Nevada County Department of Behavioral Health, Nevada County Stand Down, Nevada County Court System, local Senior Services, Sierra Nevada Memorial Hospital, and the Tahoe Forest Health System, propose to continue the Nevada County Veterans Outreach and Resource Program. This program includes reaching out and connecting Veterans within Nevada County to behavioral health support and other services.

The Welcome Home Vets Veteran Outreach Coordinator (VOC) will educate Veterans and their dependents covering all services and resources available to Veterans within the county. Additionally, the VOC will continue to build upon the successful outreach that has been established, which include:

1. Maintaining the Veterans Resource Center within Sierra College – Truckee and Grass Valley Campuses.
2. Continue to be available at least one day a week to provide referrals and support.
3. Continue to work with the Nevada County Court Administrator to identify Veterans in the court system and provide therapy while incarcerated.
4. Work with the county's Continuum of Care program to help serve the homeless Veteran population.
5. Continue relationships with local media outlets to publicize programs available to Veterans.
6. Maintain relationships with non-profits and programs serving Veterans in Nevada County.
7. Maintain the peer counseling program.
8. Assist in transition classes at Beale AFB.
9. Attend local events to reduce the stigma surrounding mental health and promote treatment.

The goals and objectives listed below have proven to be effective and are evidence-based in increasing the number of Veterans seeking mental health and/or substance abuse treatment, and thus improving the mental health of Veterans in Nevada County:

1. Outreach: Early identification of PTSD and other stress reactions is critical. Quickly referring people to treatment can shorten their suffering and lessen the severity of their functional impairment.
2. Treatment for Military Related Trauma: Available PTSD treatment can address the primary symptoms of PTSD by helping the client bring under control the vivid re-experiencing of the trauma and continual re-appraisal of the event so they can feel better about themselves and their actions. In addition to addressing the symptoms, treatment addresses functional limitations such as relationship and trust issues, anger management, feelings of alienation, sleep disturbances, and other limitations.
3. Peer Support: A variety of peer-consumer-run models exist in the community and the VA system, such as:
4. support groups, drop-in centers, consumer-run organizations, warm lines and Internet support groups and message boards. Research on consumer-run services has consistently yielded positive results.
5. Family Support: Family support is fundamental to a service member's recovery from military-related trauma. According to a 2005 Department of Defense (DOD) survey, 74 % of DOD active-duty personnel cope with stress by talking to a friend or family member. Spouses and family members are often the first to recognize when service members require professional assistance and play a key role in influencing service members to seek help.

As stated in section A, 34 Veterans (less than 1% of our Veteran population) were identified as being homeless this year and the possibility of eliminating Veteran homelessness in Nevada County is a real possibility. WHV partnered with other county organizations to purchase items to construct "Life packs" consisting of new socks, gloves, t-shirts, toiletry items, sleeping systems as well as a list of references and resources available in ways to break the cycle of homelessness. These life packs were distributed to county agencies and non-profits throughout the county where the homeless population are known to use. Additionally, WHV has also reached out to the County Association of Realtors to promote the HUD/VASH program and to educate property owners and managers on the need to support it when Veterans take that step to better their situation.

### Section C: Proposed Implementation Approach

As stated in section B, Welcome Home Vets has continued to provide outreach to Veterans and their family members. WHV is entirely staffed by Veterans, their families, and volunteers in the community who know and understand the struggles of Veterans and their families. As with many non-profit organizations securing funding for WHV is a continual effort. The organization depends on the generosity of county citizens to make private donations. Additionally, the organization works with local businesses to promote fundraising events and word-of-mouth advertising of the organization. The successful award of the Prop 63 grant for FY19-20 has provided an opportunity for the organization to focus less on fundraising events and instead increase efforts on outreach. The increased efforts on outreach have provided an opportunity for more Veterans to receive the therapy that provides Veterans with the tools to be successful in life after service. Welcome Home Vets continues to host fundraisers and seek donations from the local community to ensure that funding remains to ensure that therapists are paid for the time they have billed. Ensuring that therapists are paid timely provides the organization with an opportunity to seek additional therapists to provide services to Veterans and their families.

The success of the Veterans after receiving therapy has been so impactful, one Veteran volunteered to become the Veterans Outreach Coordinator (VOC) and has remained in this role for the past three years. The VOC provides his services for free, so that the majority of the operating funds go directly for therapy. It is the VOC's generosity with his time that provides the organization with an opportunity to keep operating costs low and thus provide even more free services to Veterans and their families.

Welcome Home Vets partnered with the service providers listed in section B has provided input and continue to support this proposal. Welcome Home Vets has reached out to other Nevada County Veteran centric non-profits to establish collaborative measures reaching even more Veterans and their families.

Most screenings are conducted by the VSO and referrals are made to WHV for an initial meeting. It is at this initial meeting that a follow-up screening is conducted to ensure that proper documentation is recorded for therapy services. The WHV screener / interviewer is a Veteran who has been through the program himself who is well versed in the indicators of mental health issues and substance abuse.

The VOC attends monthly meetings with the county, city chamber commerce, local fraternal organizations and local Veteran service organizations. The coordinator provides information on planned outreach activities, upcoming events to share success stories. WHV works with the Beale AFB Family Support Squadron and is a presenter in their Transition Assistance Program. This is yet another effort to educate those separating from the military about the services available to Veterans who plan to reside in Nevada County.

The expectation is that this program will continue to meet its goal of providing information about available mental health and substance abuse treatment services to at least 300 unduplicated Veterans annually. The VOC will continue to educate staff members of partner agencies on available services and referral options available to Veterans. Additionally, the VOC will meet annually with at least 10 agencies to address gaps and coordinate system changes in the outreach and referral process among agencies and non-profits in Nevada County.

Potential barriers to the success of providing services to Veterans in Nevada County include:

1. Unfamiliarity of personnel in other agencies with the identification of Veterans in need of services coordinated by the Veterans Outreach Coordinator. This will continue to be addressed by the Veterans Outreach Coordinator through collaboration with these agencies to develop and maintain relationships that will enable the establishment of a formal referral process.
2. With the majority of Nevada County being un-incorporated, making connections with those who live in these areas will be difficult. The VOC will ensure that each small town has literature of Veteran services placed in the Post Office lobby, frequented stores and marketplaces. Quarterly radio interviews discussing program services and success stories, will also assist in reaching these Veterans.
3. Reluctance of Veterans in need of treatment to engage in treatment. This will continue to be addressed by the Veterans Outreach Coordinator who will collaborate with service providers on the concept of a proper warm hand-off of a Veteran to the appropriate agency provider.

Welcome Home Vets has been a successful program for all the individuals that it has served. Many Veterans and family members that have received therapy through WHV volunteer their services. This is a way that they can give back to help the program that helped them. WHV has a measurement of success of keeping Veterans local and the therapy they receive continues to keep Veterans from attempting or committing suicide.

In an effort to treat even more Veterans, WHV has proposed an initiative to other Veteran focused non-profits to join forces as one large Veteran non-profit. This is an additional effort by the organization to share services and possibly lower operating costs and reach as many Veterans as possible. Those non-profits have expressed interest in joining as they possess the same struggles with limited funding. Additionally, requests for local donations and applications for other grants will be submitted. Annual fundraisers are conducted each year, however results from them vary.

#### **Section D: Performance Assessment Data**

Collection of data associated with metrics will be the responsibility of the Veterans Outreach Coordinator. With the scope of the program and other volunteers involved, the VOC will stress to all key personnel the importance of accurate data collection. The VOC will educate staff on the required data elements, and the importance of accurate data collection for the metrics.

Collected data associated with metrics will be reviewed quarterly by the Veterans Outreach Coordinator. Any missing or data affected by elements outside the control of the Veterans Outreach Coordinator will be annotated in the Performance Assessment and Data table. The completed Quarterly Progress Reports and/or narratives will be reviewed by the Nevada County Veterans Services Office before submission to CalVet. Evidence of review will be kept in the form of a signed copy of the report.

Quarterly review of the metrics by VSO staff and the Veterans Outreach Coordinator will provide concrete evidence of the success of the program but will also show where behavioral health disparities of the Veterans we reach out to can affect how the program is seen to be performing.

Performance Measurement #1: Provide information about available mental health services and substance abuse services to at least 300 unduplicated Veterans.

Performance Measurement #2: Identify and provide services or referrals to 30 minority and underserved Veterans.
