

An Open Letter from the Businesses, Non-Profits, and Civic Leadership of Nevada County in Support of California's Public Health Mandate

You pull up to a 4 way stop in Nevada County, and no one moves because we all wave to each other to go first? Sound familiar? If so, then you have experienced the Nevada County way. We are the community that takes care of each other. Today, we need that community spirit more than ever.

Remember when we sheltered at home and everything was shut down? It was hard but we did it and Nevada County held at 41 cases for a month. Then, to prevent businesses from failing, and because our mental health from living in isolation was threatened, we started to re-open.

Today we are at 108 confirmed cases of COVID 19 and rising. We have people across the spectrum refusing to do what seems to be a much easier sacrifice than isolation; wearing a mask in public. Our businesses, elected officials and public health officers are facing threats. These are our community members doing their best to keep us safe. Our public health officials are educated in science and medicine. They are not politicians, they are public servants dedicated to public safety. More than ever our lives depend on being able to trust guidance from public health leaders and departments. When we silence or threaten those charged with safeguarding the public's health, we undermine our ability to stay as healthy as possible.

Who are we impacting by not following the guidelines? Maybe it's your 16 year old neighbor at their first grocery store job, being harassed while asking a customer to wear a mask. Maybe it's your aunt or nephew who has an auto-immune disease and is high risk. Maybe it's law enforcement, called over a mask dispute, instead of managing a far greater emergency like an accident or fire. Where will we be if we don't follow the guidelines, and cases continue to rise? Likely headed into another shutdown which would devastate our local economy even more.

At this moment in history, we will be remembered for our sacrifice and our ability to adapt while facing increasing financial instability, mental health challenges, and public health crises. We must ensure Nevada County remains strong. We must wear masks, practice social distancing, and wash our hands regularly. This is for the benefit of us all.

If you agree wearing a face covering in public and continuing social distancing is better than isolation and shutdown, please let your voice be heard. Attend virtual public meetings, write or speak to your supervisor or local elected, and share your support for enforcement of the mandate. Write a letter to the editor. Write or call your favorite stores and commend them or insist they enforce mask wearing. Share this letter with your networks. Do your part to keep Nevada County safe and resilient.

Please join us, the undersigned businesses and community members, in taking a stand to protect our public health officials, our front line essential workers, our neighbors and yourself by following the state mandate to wear a mask when in public and signing this petition today! <http://chnng.it/bcMGsSJdn2>
Together we will rebuild Nevada County. #wearamask #NevadaCountyStrong

Signed,

Julie and Richard Baker, Nevada City

Dear Honorable Board of Supervisors,

Thank you for your continued support of the CA Public Health Mandate. You have worked tirelessly to help local businesses make adjustments to come into compliance. Thank you also for creating unique and positive public events to help local businesses stay afloat during these impossible times – Events like the CarHop and Drive-in Movies are giving us safe outlets to get out and have fun. I hope to support more of these types of creative solutions in the future.

As a large scale event professional, I understand how dangerous public events can be, not just through the possibility of viral spread, but through numerous other dangers, like fire, electrical shock, food safety, and possibilities of physical injury. Thank you for putting safety first in all the public gatherings your permit.

While there has been a small vocal minority by some resistant to public health, they are only pushing for unsafe practices that put us all at risk. Please know there is overwhelming public support in Nevada County to stay the course and continue local compliance with public health orders.

I would also like to thank the Environmental Health Department for their assistance in helping our local restaurants and shops come into compliance. We were able to skirt the state-wide shut down, and it is because of the great work of our community leaders.

Thank you again,

Stephanie Nix

New eComment for Nevada County Board of Supervisors July 14, 2020 meeting Agenda

Dee Hayward submitted a new eComment.

Meeting: Nevada County Board of Supervisors July 14, 2020 meeting Agenda

Item: 40. SR 20-2909 Acceptance of the 2019 Novel Coronavirus (COVID-19) informational presentation to the Board.

eComment: I appreciate that the Nevada county Board of Supervisors takes covid-19 seriously and is following the state of California's lead in keeping all citizens safe. I believe in science, and I trust what Dr. Fauci and many others are saying about this very dangerous virus. thank you for keeping this county safe and intern safeguarding our reputation as a caring and intelligent community.

Subject: Thank you for helping to keep Nevada County safe

CAUTION: This email originated from outside of County of Nevada email system. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Board of Supervisors,

I want to thank you for continuing to support the Public Health mandate. As a senior citizen with high risk issues, I am particularly concerned about any efforts to defy the Governor's orders to keep Nevada County safe. As I see our COVID-19 numbers increase every day, I know that more Nevada County residents are becoming ill regardless of their age groups and that carelessness is one major cause. Thank you for creating and supporting alternative events so that families can safely leave their homes for recreation and dining. It is so critical that we all wear masks during this time as we watch California's numbers rise. I cannot understand anyone who would object to the recommended measures like wearing a face covering, social distancing, and hand-washing. These seem like such simple methods to take in order to be considerate and protective of ourselves and others. Much appreciation goes, too, to the Environmental Health staff for helping to keep our restaurants and small businesses compliant and safe.

You have been stalwart in your support of sensible guidelines, and I thank you for what is, I'm sure, not an easy job.

Sincerely,

Judith McCarrick

Nevada City

New eComment for Nevada County Board of Supervisors July 14, 2020 meeting Agenda

Kate Strolle submitted a new eComment.

Meeting: Nevada County Board of Supervisors July 14, 2020 meeting Agenda

Item: 40. SR 20-2909 Acceptance of the 2019 Novel Coronavirus (COVID-19) informational presentation to the Board.

eComment: Thank you for your continued support of the CA Public Health Mandate. There seems to be a group of people in this county who oppose health mandates and push for unsafe practices. I have even heard that one group is trying to have an alternative fair on private property, and that they want schools to open no matter what. Please know there is overwhelming public support in Nevada County to stay the course and continue local compliance with public health orders.

Board of Supervisors
County of Nevada
950 Maidu Avenue
Nevada City, California

PUBLIC COMMENT:

Dear Board of Supervisors:

I am a 65 year old resident of Nevada County. I am an at risk person according to statistics.

I have felt very grateful to live in this county where in fact, so far we have had only one reported death from Covid. Additionally, there is only one (1) active hospitalization reported as of today.

I support a balanced approach to public health guidelines, including Health Freedom – freedom to choose how I treat my body, including no forced vaccinations.

The safety of a rushed vaccine is highly questionable.

Sincerely,
Marta Macbeth

Dear Ed and Board,

We need to open up our county. It made sense to lock down for two weeks when we didn't know what was going on but now according to the CDC, the death rate is .26 percent which is slightly more than a bad flu.

Yes, cases are up because we're testing more. The death rate is way down. We flattened the curve now we need to get on with our lives. We are destroying our businesses and our schools.

They've been trying to make a CV vaccine for almost 30 years. It's been a catastrophic failure. The animals developed antibodies but when exposed to the virus they got much sicker and many even died, while the unvaccinated animals were fine.

Studies have suggested that coronavirus vaccines carry the risk of what is known as disease enhancement, where instead of protecting against infection, the vaccine can actually make the disease worse when a vaccinated person is infected with the virus. The mechanism that causes that risk is not fully understood and is one of the stumbling blocks that has prevented the successful development of a coronavirus vaccine.

We cannot stay locked down waiting for some mythical vaccine. MERS and SARS which were both way more deadly, went away on their own.

Sweden didn't lock down or close schools. They protected the elderly and immune compromised and everyone else was out working and going to school. Their hospitals were not overwhelmed and now they have herd immunity. We need to be like Sweden. You can't hide from a virus.

We now know, not to put covid positive patients in nursing homes, not to put patients on ventilators unless it's a last resort and we have a number of antiviral treatments that are working. We all need to get back to work.

Can we please have leadership like Placer County where they are actually reading the science and being leaders! We need you to stand up for our businesses, our community and our children.

Thank you,

Sheri Fogarty

Grass Valley

Ps...

SARS COV Vaccine info:

This is like when you hear of people getting the flu shot and ending up with a worse flu than those who didn't get the flu shot but times a thousand....

They are going ahead with human trials in Washington State, AND skipping the animal studies that should be done beforehand (and as usual, no placebo testing.)

From the article:

Studies have suggested that coronavirus vaccines carry the risk of what is known as vaccine enhancement (which was called Disease Enhancement until they changed the name!), where instead of protecting against infection, the vaccine can actually make the disease worse when a vaccinated person is infected with the virus. The mechanism that causes that risk is not fully understood and is one of the stumbling blocks that has prevented the successful development of a coronavirus vaccine.

Read more here:

<https://www.reuters.com/article/us-health-coronavirus-vaccines-insight/as-pressure-for-coronavirus-vaccine-mounts-scientists-debate-risks-of-accelerated-testing-idUSKBN20Y1GZ>

Check out this study from 2012:

"These SARS-CoV vaccines all induced antibody and protection against infection with SARS-CoV. However, challenge ("Challenge" meaning that they were then exposed to the virus) of mice given any of the vaccines led to occurrence of Th2-type immunopathology (meaning you get really sick, even sicker than those not vaccinated) suggesting hypersensitivity to SARS-CoV components was induced. Caution in proceeding to application of a SARS-CoV vaccine in humans is indicated."

Hi Ed, I am interested in this item. I would ask you to postpone this item until the pandemic situation allows Many of us who have strong opinions on this topic are able to attend the board meeting without risk. I am old (yes really old, 82 in August of this year) and have been type 2 Diabetic for many years. My Doctor says "stay home" which I do until I wish to start eating cat food. (Just kidding, but the cat does eat better than I do most of the time.)

I request a delay in voting on this topic until many interested of us are able to attend without risk.. This also begs the question of how many people are asking for this change? People who have a legitimate concern, not including those influence by strong opinionated neighbors.

I believe there are many in our community who would attend were it not for covid-19 fears

Thanks for the consideration Ed.

Chuck Coover

Discussed and agreed to by Jay Kuca also.

Hello I am a mom of a 3 yo old. I live in Nevada county and have been a health care practitioner nationwide for over 17 years. I am deeply disturbed by the decisions this county is making as well as the nation in general. I do believe in standard precautions and practice wellness and standard precautions and droplet when appropriate with clients. That being said masks are not appropriate, safe or even effective for children and most of the general population, same goes for social distancing. There are many, many studies indicating that kids are better off and the communities going back to school. I am deeply disturbed at the lack of consideration and awareness of these shutting down schools and businesses physically, psychologically and more on many of our population who are not privileged enough to enjoy staying home, who may not have safe homes or homes at all.

There are many known treatments for Covid including hydroxychloroquine, azithromycin, zinc, as well as high doses vit c and other holistic measures. There are local doctors who have had and treated Covid successfully as well as many nationwide who have treated many patients without hospitalization.

On another note, there may be a rise in cases. This is the natural state of viruses. But death rates are extremely low. Our hospitals are not full, rather empty. My elderly patients are suffering physically and emotionally from being isolated. My disabled younger clients and parents are suffering financially and in many other ways from not having access to their resources or the relief schools give them. I can go on and on...I am personally "high risk", with history of autoimmune disease I've been treating naturally for over 15 years, bc I have been paralyzed by pharmaceuticals, and suffered for years by health care mandated vaccines etc. I have read every cdc insert and who statement, and quite frankly have been saddened by the direction of our medical system for a long time. We are a blessed community with a huge number of healers and MD who have awareness in practices outside the standard medical world which can keep our community safe and well. Let's use our natural resources!!! Let's heal our community!! Let's return to schools - people can take the precautions they choose, but allow us our freedoms, our childhood, our constitutional rights to choose what is right for our own bodies!

Thankyou
Carianne b

Hello to you all,

At the last meeting, I implored you to create a holistic health advisory committee, in response to Covid.

This request fell on deaf ears.

You stated that you have the experts that you need, being The Who, CDC and public health department.

The important point to note is that these supposed "experts" say that there is no known treatment for Covid symptoms.

Why in the world would you draw upon experts, who say that they know nothing?

This is when doctors throughout the world are successfully treating Covid patients with hydroxychloroquine, azithromycin and zinc, as well as high dose vitamin c iv therapy.

To this Dr. Cutler stated that there are studies looking into this.

To this I again repeat, regardless of studies, doctors are treating Covid, with these treatments as I write these words.

It is your civil duty to research these treatments and make them available within our community. This is your duty,

I am attaching the evidence of the medical physicians and scientific studies that are upholding what I am saying. Now you cannot say that you did not know.

I have also attached the studies and lectures from Osha trained specialists, that masks are not only ineffective filtering viral particles, especially in people that are not coughing or sneezing, due to the particle filtration size, but they can harbor bacteria and promote disease.

I have now heard of 3 local people who have developed respiratory illness, directly related and diagnosed as having been caused by prolonged mask wearing.....and just this morning had a message from a local mother that her 14 year old daughter passed out from wearing a mask in the heat.

So again, you now have been served the evidence that shows that masks can be harmful.

Again, it is your duty, as an elected official, by the people, to review this information.

So again, I implore you to create a holistic health advisory committee of the people's choosing...formed with true experts that are treating Covid successfully. I implore you to not accept state relief funding if that means that you must

follow executive orders and recommendations that put your constituents health at risk as well as our economic security at risk. I recently heard that Nevada City was to receive 50,000 of the 10 million that you are getting from the state. Will 50,000 come close to covering the harm and damage that this lockdown has created? No. By your actions, our county is going to be destroyed.

So again I implore you to research these issues more deeply, drawing from sources other than the mainstream news outlets...dedicate your time to finding the people who are successful and who are empowering others to take charge of their health...In regard to the vulnerable, search out the vulnerable and fortify them that much more. In the Philippines, they are giving out vitamin c.

WE come to you now hoping for harmony and working together.

I want to trust that beyond being politicians, that you are kind and loving human beings that truly want the best for our community.

I want to trust that you truly care for the world that you are leaving for your progeny and that you, like I have been, are willing to stay up until 3 am night after night after night, to find information to protect our community.

I want to trust that you are that dedicated...and that you grasp that unless you do, our lives are going to be irreversibly changed, as you know as many of us do, we are not going to mask this away and that this is the tip of the iceberg.

If these words are again, unheeded, be aware that by your very actions, or rather refusal to act, we the people will be forced to go to the next level of litigation.

Many of us within this county are well aware of the far reaching ramifications of the choices that you are supporting. We refuse to be guinea pigs in this societal experiment and we are dedicated to brining in outside forms of information to educate those that are on the fence and fearful...left with not knowing what to truly do to protect themselves besides mask up and wash their hands.

At freedomloveproject.com, there is a host of information and will continue to grow as we have concerned citizens from around the nation building this site.

Sincerely, your constituent,

Penelope S Sullivan

Subject: Questions for the Nevada County Board of Supervisors and Staff re COVID 19
Importance: High

CAUTION: This email originated from outside of County of Nevada email system. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Supervisors,

First let me say that by not having an in person board meeting today you are betraying your oath to the citizens of this County who you were elected to serve. There is no "health" or "safety" rationale for it. Our County COVID-19 numbers continue to be almost negligible and are in fact far less dangerous than the seasonal flu. We have had 1 death during this "pandemic" in a county of 100,000 people. In the last year for which we have statistics (2017-2018) we had 30 flu related deaths. While I understand it was very uncomfortable to be forced to actually face your citizenry as you had to at the last board meeting, it does not excuse you hiding from them at this meeting. Supervisor Hall's embarrassing "leadership" and handling of public comments at the last meeting is a "you" problem, not a "we" problem. By not allowing for public comment today in person you are actually violating the law.

Regarding today's meeting and COVID-19 discussion item 40 I would like to pose the following questions to staff. These questions are predicated on the fact that they SHOULD be what determines whether our schools in this County open normally or with restrictions (see below for the options the schools face).

1. How many cases of COVID-19 have been recorded in the 4-18 year old population in Nevada County?
2. How many cases of student to student transmission of COVID-19 have been recorded?
3. How many cases of teacher/staff to student transmission have been recorded?
4. How many cases student to adult transmission have been recorded?

Here are the options schools have regarding re-opening. Assuming the responses to my above questions are what I believe them to be, anything other than a normal re-opening is cruelty and not backed by any science.

Tentative School Structure Models for the 2020-21 School Year

- **Full School.** *We know how to serve our students. If we have no restrictions from state and local public health officials, we will move forward with full school as we know it.*
- **Full Distance Education.** *We know this is very far from ideal, but we also know that there is a potential we may find ourselves in this situation at some point during the school year as the virus runs its course. We will go to this model if the Nevada County Public Health Dept requires schools to shut down*

at any point during the school year. We are also prepared to accommodate families who may choose this as an option, regardless of our school status. We are working very hard to provide staff development and improve upon our practice of delivering instruction remotely. This will prepare us for this scenario, as well as the following model.

- **Hybrid/Cohort Model.** *We have tentative plans in development that would allow us to adhere to the guidelines from the CA Dept of Public Health, and we are coordinating student attendance days with neighboring Nevada County districts. This model would involve two cohorts of students who alternate student attendance days. The model accommodates for physical distancing, adherence to sanitation practices, and all other required safety protocols and precautions.*

Eric Christen
Citizen of Nevada County

Dear Board of Supervisors,

As a twenty year Nevada County resident and mother of two school aged children, I am very concerned with the direction of our state and local leadership. The Nevada County Board of Supervisors should be focused on protecting locals from the primary source of Covid spread and Covid deaths in our state? Gov. Newsom should not have forced Covid patients into uninfected nursing homes, transferred Covid infected inmates to uninfected prisons, released sex offenders early from Covid infected prisons and left our southern border open which flooded Imperial County hospitals with Covid patients (see links below). Gov. Newsom facilitated Covid spread throughout our state and contributed to thousands of avoidable deaths. Now he wants school kids to suffer through oppressive social distancing measures he NEVER enforced in CA jails and prisons.

Nevada County nursing homes, jail and juvenile hall are very vulnerable to similar state mismanagement. Will our BOS make a public statement defying any order from our state or local health department that would allow Covid infected patients into our nursing homes, jail or juvenile hall? Our local Covid patients should stay in the hospital until they are well enough to recover while quarantined at home. If our BOS believes masks save lives, there should have been mandatory masks on all our prisoners and enforcement of social distancing in our jail, from the beginning of the outbreak. Our juvenile hall never should have taken out of county children after March 16, 2020 and forced them to isolate for 14 days. That is inhumane for a child, especially those with traumatic childhoods, too far away for family visitation. If the BOS supports our governor and believes his measures work, they should have done everything listed above BEFORE asking healthy, law abiding voters and low risk school children to do what was never enforced statewide in our prisons and jails.

CAUTION: This email originated from outside of County of Nevada email system. Do not click links or open attachments unless you recognize the sender and know the content is safe.

My son has been traumatized by covid 19 these last couple months, it's an extremely stressful situation and the divide it has caused between "makers and non makers" (he has witnessed many disagreements in the stores etc.) is very sad. I believe everyone has the right to make the decision that's right for themselves and their family and allow others to do the same regarding masks and social distancing. My son needs desperately to return to a normal school routine. I feel if we go back to school trying to implement new guidelines that are very hard for children to follow it will cause further harm to my child so if that's going to be the case we are going to be forced to leave the school we love and opt to homeschool.

CAUTION: This email originated from outside of County of Nevada email system. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I do not support the governors handling of the virus, nor his forcing of compliance of mandates with the threat of withholding \$10,000,000 from the county. Our children have the right to go to school. They are not "spreaders" of the virus. This is the science. Many other countries have their schools fully open without masks and social distancing. They are not having a spike in cases, with the normal return to school. Our children will be sacrificed for politics, if Nevada County does not have our students return to school in a normal way. Many prominent scientists and doctors, do not agree with the CDC or WHO on all of what many see as the absolute rule of truth on Covid. These scientists and doctors, who step forward are conveniently ignored or censored. Convenience, money and politics are the priorities.

Dear Board Members and Clerk,

According to the California Emergency Services Act (ESA) Section 8558-b: a state of emergency can only be called if the threat overwhelms the current resources of the state.

Furthermore, the state of emergency has to be terminated at the earliest possible date. Section 8558 (b) "State of emergency" means the duly proclaimed existence of conditions of disaster or of extreme peril to the safety of persons and property within the state caused by such conditions as air pollution, fire, flood, storm, epidemic, riot, drought, sudden and severe energy shortage, plant or animal infestation or disease, the Governor's warning of an California Emergency Services Act 4 California Governor's Office of Emergency Services earthquake or volcanic prediction, or an earthquake, or other conditions, other than conditions resulting from a labor controversy or conditions causing a "state of war emergency," which, by reason of their magnitude, are or are likely to be beyond the control of the services, personnel, equipment, and facilities of any single county, city and county, or city and require the combined forces of a mutual aid region or regions to combat.

THUS: A state of emergency related to public health can only be declared if the threat overwhelms the response capabilities of California's health care practitioners

Thousands of healthcare workers are being furloughed in California, so there is zero evidence of grounds for this state of emergency based on public health.

There is no "threat that overwhelms the current resources of the state" since the covid-related deaths (with inflated numbers) are fewer than 3,000 in CA, compared to 6,000+ for the average seasonal flu.

Therefore, covid-19 cannot lawfully be classified as an "epidemic". An epidemic is when there are disproportionately large numbers experiencing an outbreak of a disease. There is no evidence of this in California.

Therefore, the basis for the State of Emergency is invalid and unlawful (see section 8558 b). As we have clearly seen here in California, with the virus fatalities, they are approximately 1/3 of the typical fatalities for a regular seasonal flu.

Therefore, our state resources are not overwhelmed.

Therefore the state of emergency should have been terminated according to California law, which states, at the earliest possible date that conditions warrant.

Therefore there are no legal grounds for an additional extension or a new state of emergency to be declared.

Thus, according to California law, the grounds for the state of emergency do not exist.

Therefore, the current state of emergency in California is invalid and unlawful.

Regarding the length of the state of emergency, the law is murky. For the declaration of local emergencies, a governing body is required to renew the state of emergency after 30 days. For a state-wide declaration of state of emergency, whereby the state is controlling the food and pharmaceuticals, the orders expire after 60 days. § 8627.5.

The temporary suspension of any statute, ordinance, regulation, or rule shall remain in effect until the order or regulation is rescinded by the Governor, the Governor proclaims the termination of the state of emergency, or for a period of 60 days, whichever occurs first.

(Section 8567(b): Whenever the state of war emergency or state of emergency has been terminated, the orders and regulations shall be of no further force or effect.

This means that all of the orders that were created under the State of Emergency are also expired, including but not limited to: stay at home order, social distancing, wearing of masks, closing of businesses and schools, etc.

Note: There are countless reports of other state's legislative bodies extending or denying their state of emergency declaration, but why nothing from California?

What evidence (as required by state law) have the health officers submitted to you that supports their orders?

I would like to know what the lawmakers are doing to address this invalid and unlawful state of emergency declaration. Please denounce the Governor's authority as he has grossly over stepped and has legal right to continue this state of emergency. Enough is enough!

“There is no threat of an epidemic that overwhelms the resources of the state, and therefore according to the Emergency Services Act, section 8558(b) there are no grounds for a State of Emergency in California.”

Dear Honorable Board of Supervisors -

As the parents of a 12-year old boy, we are concerned about what "safeguards" will be required when schools are re-opened.

We strongly encourage the Board of Supervisors to allow each school to make their own decision regarding how to best suit the needs of their students, and to refrain from making any broad-sweeping, one-size-fits-all proclamations. Each school should be allowed to address their student's concerns and develop the most effective way to educate their students.

The Board of Supervisors has enough to worry about with the rest of the County's economy without diving into educational policy.

Sincerely,

Brian and Maria Wirtz

New eComment for Nevada County Board of Supervisors July 14, 2020 meeting Agenda

Kalub Jarosh submitted a new eComment.

Meeting: Nevada County Board of Supervisors July 14, 2020 meeting Agenda

Item: 40. SR 20-2909 Acceptance of the 2019 Novel Coronavirus (COVID-19) informational presentation to the Board.

eComment: You need to be looking at the infectious mortality rate not the infection rate. The overall infectious mortality rate is dropping and the CDC is currently debating whether or not we are justified in being in a continued pandemic. CDC infectious mortality rate is .26% and dropping. Infectious rate and increased cases should be the metric to track. especially when a significant amount, 10x more than expected, of people have already developed antibodies and not developed symptoms.

Hi, my name is Joseph Bonin bolo. I live in Grass Valley. I'm in Nevada County resident and I'm commenting on the mask issue. It's for public comment and this would so I want to say I strongly oppose the mandated order from the public health office and Governor Newsom. There is no science-based evidence of mass protecting from viruses as well as causing harm to the individual mask where And the statistics compiled by Stanford University, California and New York plenty show. The coronaviruses is no more deadly than the seasonal flu the willingness for the Board of Supervisors to grow in the same direction a governor, you know shows their lack of integrity and more importantly their failure to do the proper investigation and research. Um, and so I'm going to call back and and we we leave my comment. You can you can go ahead and discard this please. Thank you.

As a restaurant employee working for a man that follows the rules completely, I am disgusted that there are restaurants in town still seating customers indoors.

There was a meeting last night with local restaurant owners for the purpose to come up with a plan to not comply.

This is outrageous. My employer is trying to stay in business and only have outdoor seating in the heat and restaurants are allowing customers dine indoors where it is cool and comfy. Which would you choose? So we go out of business while they get to stay open?? Who is in charge of this?

Humpty Dumpty's and Valentina's are just name 2. Check out 1849 as well.

Please, if we are allowed to break the rules, then why are there rules to begin with?? What are their penalties?

please let me know who to contact and what will be done

Thank You
