Dear Supervisor Hall,

Health and safety rules are being blatantly ignored in our community. Individuals and businesses are publically putting our community at greater risk. Their behavior is causing our community to be in grave danger regdring public health and our economy. Those who are not complying are causing undue stress and anxiety throughout our community and are a public nuisance.

Our COVID numbers are spiking. Nevada County will soon be on the State's list of counties required to close down further to protect public health. The people and businesses who are not cooperating to protect the health of our community are putting us at risk of further economic damage.

We need someone to step up and enforce these rules. So far, the police and other authorities have not done what is needed to provide a safe community. Without significant, strong enforcement by the County, those who have been ignoring laws will continue to do so. Their irresponsible attitudes and actions are putting our entire county at risk and taking away the rights of everyone to live in a safe environment.

Please make every effort to pass the Revised Ordinance and begin enforcing it immediately with no exceptions. Our lives depend on it.

Thank you,

Rachelle Bloksberg

Dear Honorable Board of Supervisors,

Thank you for your continued work at protecting the safety and health of our community. As COVID-19 numbers rise, it is more important than ever for our community to come together to fight this virus so that our economy can remain open.

I am writing in support of SR-20-3359 and the enforcement of the health mandate. It is unfair to the hundreds of businesses working to protect employees and customers to allow a few non-compliers to flaunt their disdain for our health. Through their actions, they are dragging this crisis out indefinitely--causing real harm to the physical and mental health of community members.

Thank you for your Yes vote and your continued public service.

Dear Members of the Nevada County Board of Supervisors – the following are my thoughts for your consideration and in support of the actions of the Nevada County Environmental Health Departments actions related to the Covid Pandemic.

“Unlike certain individuals and business owners, the Nevada County (NC) Environmental Health (EH) dept. staff have to be considerate of the health of our entire populace - everyone, even those of us who choose to put our own “freedom” above all others around us. They do this every day - this is why when we eat out our food is safe for consumption, made in a facility that has been designed to insure a consistency of cleanliness and food safety.

I happen to have a rarified understanding of the complexity of this, owning an architecture firm which produces plans for all sorts of projects which are scrutinized by the NC EH - Septic systems, commercial kitchens, cannabis facilities, medical offices, public swimming pools, school facilities, etc...

On all occasions, the level of professionalism and quality and care of review has been rigorous and consistent - what we all should hope for and expect. The staff are timely in their response, friendly, creative, bright and collegial - what we all should hope for and expect.

The NC EH has no interest in making our local businesses less viable, their only interest is in making them consistently safe for all of us to engage with - I strongly disagree with anyone who believes otherwise and implore everyone to support them in this effort, specifically during these unprecedented times.

Oh, and, wear a mask.”
