

Scope of Work - Inspection Services

Psomas' Construction Inspector can, on a daily basis, check the quality and quantity of the work performed by all trades and to verify provisions of the contract documents are being fulfilled. Psomas will **inspect construction methods, materials, techniques, and sequences** to evaluate the Contractor's compliance with the construction documents, provide observation of material testing, and will review all construction prior to burial. Our Construction Inspector will continually monitor the Contractor's implementation of their traffic control plans and will verify all required construction access for residents and businesses during the project detour.

Daily Inspection Reports can be prepared and completed each day to document observed construction activities and will include the number, classification, and hourly summary of Contractor's activity and equipment, the work performed by apprentices, weather, and can include any salient discussions, abnormal occurrences, unforeseen conditions, and observations noted by the field inspector(s) during the course of their inspection duties.

If requested by the county, the Daily Inspection Reports shall be submitted to the County's Project Manager on a daily basis via email or hard copy.

Any substandard work shall be rejected and the contractor will be notified in writing to replace or repair the work to project plans and specification.

Our Construction Inspector will mark up a field redline set of drawings to incorporate Contractor record drawing markups, prepare punch lists, coordinate and conduct the final inspections and acceptance walk-throughs.

Digital photographs will be taken daily to document the progress of the project and will be stored and provided to the County in digital format at the close of the project along with all other digital data on a flash drive.
